

◆ Manual Feed Mode

<Function>

This mode is used to scan documents separately and then combine the data into a single document.

When Manual Feed Mode is used, every time a sheet has been scanned, press the Start/Stop key on the scanner's operation panel.

There are 3 types of Manual Feed Mode as shown below.

On

Sheets are inserted manually one sheet at a time. Scanning starts when a sheet is inserted.

Automatic

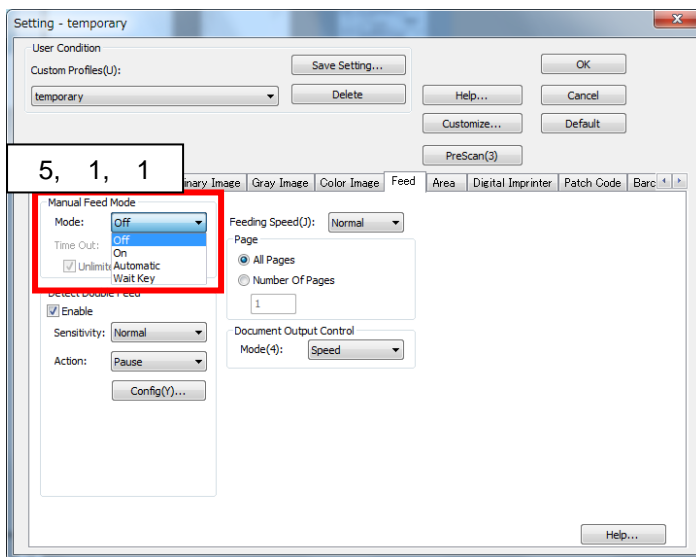

Scanning starts automatically when sheets are inserted.

Wait Key

Scanning starts when sheets are inserted and the Start/Stop key on the scanner's operation panel is pressed.

<ICP Setting Procedures>

Refer to

Manual Feed Mode - On

1. Click "Scan"  at the left side. The "New Document - Scan" dialog box is displayed.
2. Click "Scan Setting" .

<Notes>

- Depending on the scanner used, "Manual Feed Mode" may not be supported.
- The "Unlimited" check box is enabled only when the "Manual Feed Mode" is "Wait Key" or "Automatic".
- If the "Unlimited" check box is set to On, the waiting time is set to unlimited.
- The "Unlimited" function cannot be used with some scanners.
- If the scanning method is set to "Automatic Simplex" or "Automatic Duplex", Manual Feed Mode will operate as "Wait Key", regardless of whether you have selected "On", "Wait Key", or "Automatic".
- With the ISIS driver, you cannot use manual feed mode if the scanning method is "Automatic Simplex" or "Automatic Duplex".
- When you are scanning using a flat bed and this function is set to "On" or "Automatic", scanning starts automatically when the document cover is closed.
- If you are using the ISIS driver or the TWAIN driver, this function might not operate correctly for some applications.
