

◆ [Page Menu \(Insert Prev\)](#)

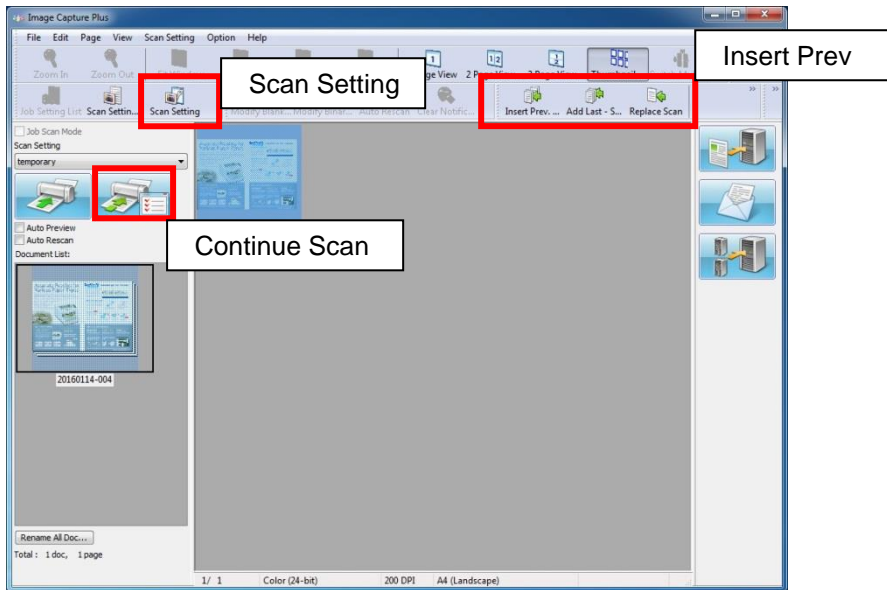

<Function - **Insert Prev**>

Inserting a scanned image before the image now displayed.

A fresh image captured from the scanner can be inserted before the image currently displayed.

<ICP Setting Procedures>

Refer to

1. Click "Insert Prev."  of the tool bar..
2. Scanning starts using the current scan setting.
3. A new image is inserted before the image now displayed.

<Notes>

- When the counter printing is set in the imprinter's print string in the scan settings, a window where you can specify the initial counter value appears before scanning starts.
- During this operation, the "Scan as New Document" check box in the "Continue Scan" dialog box is disabled.
