

◆ Page Menu (Replace Scan)

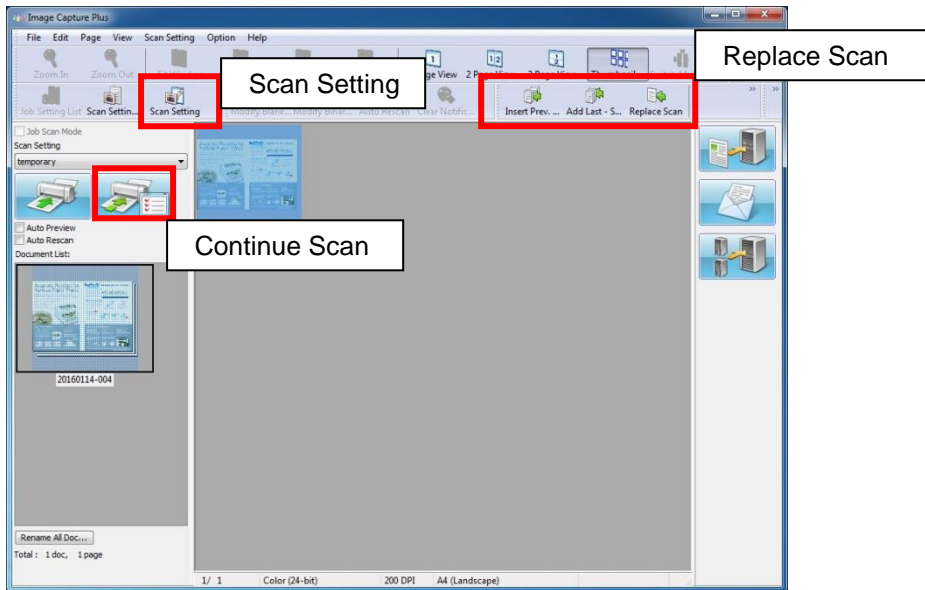

<Function - Replace Scan>

Replacing the currently displayed image with a scanned image

The image currently displayed can be replaced with a newer image captured from the scanner.

<ICP Setting Procedures>

Refer to

1. Click "Replace Scan"  of the tool bar..
2. Scanning starts using the current scan setting.
3. A new image is replaced with the specified image.

<Notes>

- Any settings for "ADF Duplex", "Automatic Duplex", "2-Page Separation" and "Multi-Crop" in the scan settings will be ignored.
- Only one page can be replaced.
