

TOUGH+

In touch and with confidence!

Built rugged to perform in your challenging work environment! For both IP wireless mobility and communication you can count on, Panasonic has your tough IP wireless handset solution.

KX-UDT131

The Tough IP Wireless Handset

- Rugged resistance to shocks, dust, and water (Hazard Level IP65 Protection*1).
- Built-in Bluetooth® for a "hands free" workstyle.
- Noise reduction and high-quality wideband voice even in a noisy workplace.
- Simple PC interface for easy updating of the 500 number phonebook and "over the air" maintenance.
- 200 hours standby time/11 hours talk time*2 for a full work day and more.

* 1 IP65 indicates complete protection from dust, oil, and other non-corrosive material and robust protection from water, up to water projected by a nozzle against the case from any direction.

* 2 Wideband with LCD backlight off and Bluetooth not in use.

Case Study: TOUGH+

In touch and with confidence!

In the kitchen of this popular restaurant, the action never stops. In between drenching shrimp in batter, washing vegetables, and grilling steaks, the chef is on the phone, placing orders with food suppliers, confirming delivery times with his wine dealer, and dealing with staff scheduling. While working, there is no time to worry about splashing water on his phone or splattering it with oil. He needs a phone as tough as his job.

Panasonic and their carrier partner offered this restaurant the ideal recipe of ruggedness and performance. In addition to IP65-compliant protection against damage by dust and water, drop-tested KX-UDT131 boasts a host of attractive features. For example, hygiene is a priority in the food service industry. With printing on the handset sealed beneath a plastic layer, frequent sanitizing alcohol wipes do not affect print visibility. Features like built-in Bluetooth® frees hands to search pantries and perform other tasks while handling calls. Above all, Panasonic delivers superb HD voice quality. In a noisy kitchen workplace, noise reduction intelligently detects and minimizes ambient noise while automatic volume control enhances call clarity.

This robust wireless handset combined with a Panasonic DECT cell station technology provides an easy-to-install expandable solution for any challenging workplace environment. With Panasonic KX-UDT131, making the tough choice is easy and smart.

Panasonic Sets Your Business Free

Today's workplace is changing. Mobility, workstyle renovation, and diversification demand flexible cloud-based mobile solutions. Pioneering Panasonic DECT and IP technologies are helping you cut the cord and getting your business on the move. When Panasonic introduced the KX-TGP600 Single-Cell DECT system with 8 simultaneous call capacity, it opened the eyes of business to the vast potential of IP wireless DECT technology and ignited a revolution in workplace communications. Supported by a wide lineup of mobile and desk-type DECT terminals, this solution anticipated the demand for greater mobility in the workplace and the needs of diverse workstyles. Now this same DNA has sparked another evolutionary leap: new high-performance terminals with enhanced functionality and improved ergonomics and the ground-breaking KX-TGP700 system with "16 handset x 16 line x 16 simultaneous call" capacity. With Panasonic, designing an IP wireless DECT system to precisely fit your needs now and in the future has never been easier.

Reduced hardware costs and the simplicity of the Panasonic IP wireless DECT system are the just beginning of the advantages. Getting started only requires an internet connection, power connection, and service through a Panasonic SIP Carrier Partner. After the swift installation without costly cable laying, functions like the Key System Feature check line status and prevent lost calls and business opportunities. Impact your bottom line with lower operation costs and energize your workplace with the power of Panasonic IP wireless DECT mobility.

Free your business and put your potential in motion with Panasonic IP wireless DECT.

*Distance varies depending on the environment.

Business phones as tough as your job.

From restaurant kitchens to factory floors, handset-hostile work environments are everywhere! Dust, water and accidental drops can disable your phone when you need it most. Workplaces can be noisy so noise reduction is a must. Keeping hands free while on a call is also on your wish list. For an IP wireless handset that checks all these boxes and comfortably fits in your pocket, Panasonic has the tough solution.

KX-UDT131
