Please read these instructions before operating your set and retain them for future reference.
Dear Panasonic Customer

Welcome to the Panasonic family of customers. We hope that you will have many years of enjoyment from your new LCD Display.

To obtain maximum benefit from your set, please read these Instructions before making any adjustments, and retain them for future reference.

Retain your purchase receipt also, and note down the model number and serial number of your set in the space provided on the rear cover of these instructions.

Visit our Panasonic Web Site http://panasonic.com

**WARNING: RISK OF ELECTRIC SHOCK**
**DO NOT OPEN**

**WARNING: To reduce the risk of electric shock, do not remove cover or back.**
No user-serviceable parts inside. Refer servicing to qualified service personnel.

The lightning flash with arrow-head within a triangle is intended to tell the user that parts inside the product are a risk of electric shock to persons.

The exclamation point within a triangle is intended to tell the user that important operating and servicing instructions are in the papers with the appliance.

**WARNING:**
To prevent damage which may result in fire or shock hazard, do not expose this apparatus to rain or moisture.
Do not place containers with water (flower vase, cups, cosmetics, etc.) above the set.
(including on shelves above, etc.)

**WARNING:**
1) To prevent electric shock, do not remove cover. No user serviceable parts inside. Refer servicing to qualified service personnel.
2) Do not remove the grounding pin on the power plug. This apparatus is equipped with a three pin grounding-type power plug. This plug will only fit a grounding-type power outlet. This is a safety feature. If you are unable to insert the plug into the outlet, contact an electrician.
Do not defeat the purpose of the grounding plug.

---

**Important Safety Instructions**

1) Read these instructions.
2) Keep these instructions.
3) Heed all warnings.
4) Follow all instructions.
5) Do not use this apparatus near water.
6) Clean only with dry cloth.
7) Do not block any ventilation openings. Install in accordance with the manufacturer’s instructions.
8) Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9) Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10) Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11) Only use attachments / accessories specified by the manufacturer.
12) Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart / apparatus combination to avoid injury from tip-over.
13) Unplug this apparatus during lightning storms or when unused for long periods of time.
14) Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
15) To prevent electric shock, ensure the grounding pin on the AC cord power plug is securely connected.
FCC STATEMENT

This equipment has been tested and found to comply with the limits for a class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

FCC CAUTION:
To assure continued compliance, follow the attached installation instructions and use only the provided power supply cord. Any changes or modifications not expressly approved by Panasonic Corp. of North America could void the user’s authority to operate this device.

Declaration of Verification
Model No.  
TH-55SF1HU, TH-49SF1HU, TH-42SF1HU
Responsible Party:  
Panasonic Corporation of North America  
two Riverfront Plaza, Newark, New Jersey 07102-5490
Contact Source:  
Panasonic System Communications Company of North America  
1-877-655-2357
General Contact:  
http://shop.panasonic.com/support

This device complies with Part 15 of the FCC Rules and all applicable IC RSS standards. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

CANADIAN NOTICE:  
This Class A digital apparatus complies with Canadian ICES-003.

WARNING:  
• For permanently connected equipment, a readily accessible disconnect device shall be incorporated in the building installation wiring.  
• For pluggable equipment, the socket-outlet shall be installed near the equipment and shall be easily accessible.

Note:  
Image retention may occur. If you display a still picture for an extended period, the image might remain on the screen. However, it will disappear when a general moving picture is displayed for a while.

Trademark Credits

Even if no special notation has been made of company or product trademarks, these trademarks have been fully respected.
Important Safety Notice

WARNING

1) To prevent damage which may result in fire or shock hazard, do not expose this appliance to dripping or splashing.

Do not place containers with water (flower vase, cups, cosmetics, etc.) above the set. (including on shelves above, etc.)

No naked flame sources, such as lighted candles, should be placed on / above the set.

2) To prevent electric shock, do not remove cover. No user serviceable parts inside. Refer servicing to qualified service personnel.

3) Do not remove the earthing pin on the power plug. This apparatus is equipped with a three pin earthing-type power plug. This plug will only fit an earthing-type power outlet. This is a safety feature. If you are unable to insert the plug into the outlet, contact an electrician.

Do not defeat the purpose of the earthing plug.

4) To prevent electric shock, ensure the earthing pin on the AC cord power plug is securely connected.

CAUTION

This appliance is intended for use in environments which are relatively free of electromagnetic fields.

Using this appliance near sources of strong electromagnetic fields or where electrical noise may overlap with the input signals could cause the picture and sound to wobble or cause interference such as noise to appear.

To avoid the possibility of harm to this appliance, keep it away from sources of strong electromagnetic fields.

WARNING:

This equipment is compliant with Class A of CISPR32.

In a residential environment this equipment may cause radio interference.

IMPORTANT INFORMATION

If a display is not positioned in a sufficiently stable location, it can be potentially hazardous due to falling. Many injuries, particularly to children, can be avoided by taking simple precautions such as:

• Using cabinets or stands recommended by the manufacturer of the display.
• Only using furniture that can safely support the display.
• Ensuring the display is not overhanging the edge of the supporting furniture.
• Not placing the display on tall furniture (for example, cupboards or bookcases) without anchoring both the furniture and the display to a suitable support.
• Not standing the displays on cloth or other materials placed between the display and supporting furniture.
• Educating children about the dangers of climbing on furniture to reach the display or its controls.
IMPORTANT: THE MOULDED PLUG
FOR YOUR SAFETY, PLEASE READ THE
FOLLOWING TEXT CAREFULLY.

This display is supplied with a moulded three pin mains plug for your safety and convenience. A 10 amp fuse is fitted in this plug. Shall the fuse need to be replaced, please ensure that the replacement fuse has a rating of 10 amps and that it is approved by ASTA or BSI to BS1362.

Check for the ASTA mark 🍁 or the BSI mark 🍁 on the body of the fuse.

If the plug contains a removable fuse cover, you must ensure that it is refitted when the fuse is replaced.
If you lose the fuse cover the plug must not be used until a replacement cover is obtained.
A replacement fuse cover can be purchased from your local Panasonic dealer.
Do not cut off the mains plug.
Do not use any other type of mains lead except the one supplied with this display.
The supplied mains lead and moulded plug are designed to be used with this display to avoid interference and for your safety.
If the socket outlet in your home is not suitable, get it changed by a qualified electrician.
If the plug or mains lead becomes damaged, purchase a replacement from an authorized dealer.

WARNING: — THIS DISPLAY MUST BE EARTHED.

How to replace the fuse.
Open the fuse compartment with a screwdriver and replace the fuse.

Safety Precautions

WARNING

Setup

This LCD Display is for use only with the following optional accessories.

Use with any other type of optional accessories may cause instability which could result in the possibility of injury.

(All of the following accessories are manufactured by Panasonic Corporation.)

• Pedestal
  TY-ST43PE8
• Digital Interface Box
  ET-YFB100G
• DIGITAL LINK Switcher
  ET-YFB200G
• Early Warning Software
  ET-SWA100 series*1
• Video Wall Manager
  TY-VUK10*2

*1: Suffix of the part number may differ depending on the license type.
*2: Supports Ver1.3 or later.

Note

• The part number of the optional accessories are subject to change without notice.

When installing the pedestal, read the operating instructions supplied with it carefully and install properly.
Also, always use the overturn prevention accessories.
We are not responsible for any product damage, etc. caused by failures in the installation environment for the pedestal or wall-hanging bracket even during the warranty period.
Always be sure to ask a qualified technician to carry out set-up.

Small parts can present choking hazard if accidentally swallowed. Keep small parts away from young children. Discard unneeded small parts and other objects, including packaging materials and plastic bags/sheets to prevent them from being played with by young children, creating the potential risk of suffocation.

Do not place the Display on sloped or unstable surfaces, and ensure that the Display does not hang over the edge of the base.

• The Display may fall off or tip over.

Install this unit at a location with minimal vibration and which can support the weight of the unit.

• Dropping or falling of the unit may cause injury or malfunction.
Do not place any objects on top of the Display.
• If foreign objects or water get inside the Display, a short-circuit may occur which could result in fire or electric shock. If any foreign objects get inside the Display, please consult your local Panasonic dealer.

Transport only in upright position!
• Transporting the unit with its liquid crystal panel facing upright or downward may cause damage to the internal circuitry.

Ventilation should not be impeded by covering the ventilation openings with items such as newspapers, table cloths and curtains.
For sufficient ventilation, see page 10.
Caution - For use only with UL Listed Wall Mount Bracket with minimum weight/load 24.9 kg (54.9 lbs).

When installing the Display vertically;
When installing the Display vertically, be sure that the Power Indicator comes to the downside. Heat is generated and it may cause fire or damage to the Display.

Caution - For use only with UL Listed Wall Mount Bracket with minimum weight/load 24.9 kg (54.9 lbs).

When installing the Display vertically, be sure that the Power Indicator comes to the downside. Heat is generated and it may cause fire or damage to the Display.

Power indicator

Cautions for Wall or Pedestal Installation
• The installation should be performed by an installation professional. Installing the Display incorrectly may lead to an accident that results in death or serious injury.
Set the optional Pedestal. (see page 7)
• When installing on a wall, a wall hanging bracket that conforms to VESA standards must be used.
  (55-inch model) : VESA 400×400
  (49-inch model) : VESA 200×200
  (see page 10)
• Before installation, be sure to check if the mounting location has enough strength to support the weight of the LCD display and the wall hanging bracket for anti drop.
• If you terminate the use of the Display on the Wall or Pedestal, ask a professional to remove the Display as soon as possible.
• When mounting the Display on the wall, prevent the mounting screws and power cable from contacting metal objects inside the wall. An electric shock may occur if they contact metal objects inside the wall.

Do not install the product to a place where the product is exposed to direct sunlight.
• If the screen is exposed to direct sunlight, the liquid crystal panel may have adverse effect.

■ When using the LCD Display
The Display is designed to operate on 110 – 127 or 220 – 240 V AC, 50/60 Hz.

Do not cover the ventilation holes.
• Doing so may cause the Display to overheat, which can cause fire or damage to the Display.

Do not stick any foreign objects into the Display.
• Do not insert any metal or flammable objects into the ventilations holes or drop them onto the Display, as doing so can cause fire or electric shock.

Do not remove the cover or modify it in any way.
• High voltages which can cause severe electric shocks are present inside the Display. For any inspection, adjustment and repair work, please contact your local Panasonic dealer.

Ensure that the mains plug is easily accessible.
The mains plug shall be connected to a mains socket outlet with a protective earthing connection.

Do not use any power supply cord other than that provided with this unit.
• Doing so may cause short-circuit, generates heat, etc., which could cause electric shock or fire.

Do not use the supplied power supply cord with any other devices.
• Doing so could cause electric shock or fire.

Securely insert the power supply plug as far as it will go.
• If the plug is not fully inserted, heat may be generated which could cause fire. If the plug is damaged or the wall socket is loose, they shall not be used.

Do not handle the power supply plug with wet hands.
• Doing so may cause electric shocks.

Do not do anything that may damage the power cable. When disconnecting the power cable, pull on the plug body, not the cable.
• Do not damage the cable, make any modifications to it, place heavy objects on top of it, heat it, place it near any hot objects, twist it, bend it excessively or pull it. To do so may cause fire and electric shock. If the power cable is damaged, have it repaired at your local Panasonic dealer.

Do not touch the power supply cord or the plug directly by hand when they are damaged.
• Electric shock could occur.

Do not remove covers and NEVER modify the Display yourself.
• Do not remove the rear cover as live parts are accessible when it is removed. There are no user serviceable parts inside. (High-voltage components may cause serious electrical shock.)
• Have the Display checked, adjusted, or repaired at your local Panasonic dealer.

Keep the supplied AAA/R03/UM4 batteries out of reach of children. If accidentally swallowed, it will be harmful to the body.
• Please contact a doctor immediately in case you doubt that the child may have swallowed it.
If the Display is not going to be used for any prolonged length of time, unplug the power supply plug from the wall outlet.

Picture noise may occur if you connect / disconnect the cables connected to the input terminals you are currently not watching, or if you turn the power of the video equipment on / off, but it is not a malfunction.

To prevent the spread of fire, keep candles or other open flames away from this product at all times.

⚠️ CAUTION

If problems or malfunction occur, stop using immediately.

- If problems occur, unplug the power supply plug.
  - Smoke or an abnormal odour come out from the unit.
  - No picture appears or no sound is heard, occasionally.
  - Liquid such as water or foreign objects got inside the unit.
  - The unit has deformed or broken parts.

If you continue to use the unit in this condition, it could result in fire or electric shock.
  - Turn the power off immediately, unplug the power supply plug from the wall outlet, and then contact the dealer for repairs.
  - To cut off the power supply to this Display completely, you need to unplug the power supply plug from the wall outlet.
  - Repairing the unit yourself is dangerous, and shall never be done.
  - To enable to unplug the power supply plug immediately, use the wall outlet which you can reach easily.

- Do not touch the unit directly by hand when it is damaged.
  Electric shock could occur.

- When using the LCD Display
  Do not bring your hands, face or objects close to the ventilation holes of the Display.
    - Heated air comes out from the ventilation holes at the top of Display will be hot. Do not bring your hands or face, or objects which cannot withstand heat, close to this port, otherwise burns or deformation could result.

At least 2 people are required to carry or unpack this unit.
  - If this is not observed, the unit may drop, resulting in injury.

Be sure to disconnect all cables before moving the Display.
  - If the Display is moved while some of the cables are still connected, the cables may become damaged, and fire or electric shock could result.

Disconnect the power supply plug from the wall socket as a safety precaution before carrying out any cleaning.
  - Electric shocks can result if this is not done.

Clean the power cable regularly to prevent it becoming dusty.
  - If dust built up on the power cord plug, the resultant humidity can damage the insulation, which could result in fire. Pull the power cord plug out from the wall outlet and wipe the mains lead with a dry cloth.

Do not step on, or hang from the display or the Pedestal.
  - They might tip over, or might be broken and it may result in injury. Pay special attention to the children.

Do not reverse the polarity (+ and -) of the battery when inserting.
  - Mishandling the battery may cause its explosion or leakage, resulting in fire, injury or damage to surrounding properties.
  - Insert the battery correctly as instructed. (see page 13)

Remove the batteries from the remote control transmitter when not using for a long period of time.
  - The battery may leak, heat, ignite or burst, resulting in fire or damage to surrounding properties.

Do not burn or breakup batteries.
  - Batteries must not be exposed to excessive heat such as sunshine, fire or the like.

Do not turn the Display upside down.
Do not position the unit with its liquid crystal panel facing upright.
Precautions for use

Cautions when installing

Do not set up the Display outdoors.

- The Display is designed for indoor use.

Environmental temperature to use this unit

- When using the unit where it is below 1,400 m (4,593 ft) above sea level: 0 °C to 40 °C (32 °F to 104 °F)
- When using the unit at high altitudes (1,400 m (4,593 ft) and higher and below 2,800 m (9,186 ft) above sea level): 0 °C to 35 °C (32 °F to 95 °F)

Do not install the unit where it is 2,800 m (9,186 ft) and higher above sea level.

- Failure to do so may shorten the life of the internal parts and result in malfunctions.

Required space for ventilation

When using the pedestal (optional accessory), leave a space of 10 cm (3 15/16") or more at the top, left and right, and 5 cm (1 31/32") or more at the rear, and also keep the space between the bottom of the display and the floor surface.

If using some other setting-up method (wall-hanging, etc.), follow the manual of it. (If there is no specific indication of installation dimension in the installation manual, leave a space of 10 cm (3 15/16") or more at the top, bottom, left and right, and 5 cm (1 31/32") or more at the rear.)

Minimum distance:

![Minimum distance diagram]

a: 10 cm (3 15/16")
b: 5 cm (1 31/32")

About the screws used when using a wall hanging bracket that conforms to VESA standards

</tbody>
</table>

When installing, do not use the screw holes (situated at the bottom of the display’s back) as shown in the following figures.

It may damage the LCD panel.

Be careful of the movable structure of the power indicator and remote control sensor.

- As factory default, the power indicator and remote control sensor are stored in the main unit. For normal use, pull out the remote control sensor from the edge side of the main unit by operating the lever on the rear panel. Depending on the setup condition such as when using the multi display, store the remote control sensor in the main unit. (see page 27)

Do not grab the liquid crystal panel.

- Do not forcibly press the liquid crystal panel, or push it with a pointed object. Applying a strong force to the liquid crystal panel will cause unevenness of the screen display, resulting in malfunction.

Depending on the temperature or humidity conditions, uneven brightness may be observed. This is not a malfunction.

- This unevenness will disappear while applying current continuously. If not, consult the distributor.
Request Regarding Security

When using this product, take safety measures against the following incidents.

- Personal information being leaked via this product
- Unauthorized operation of this product by a malicious third party
- Interfering or stopping of this product by a malicious third party

Take sufficient security measures. (see page 78, 79, 83)

- Set a password for the LAN control and restrict the users who can log in.
- Make your password difficult to guess as much as possible.
- Change your password periodically.
- Panasonic Corporation or its affiliate companies will never ask for your password directly. Do not divulge your password in case you receive such inquiries.
- The connecting network must be secured by a firewall, etc.
- When disposing the product, initialize the data before disposing. [Shipping] (see page 94)

Cleaning and maintenance

The front of the liquid crystal panel has been specially treated. Wipe the surface of the liquid crystal panel gently using only a cleaning cloth or a soft, lint-free cloth.

- If the surface is particularly dirty, wipe with a soft, lint-free cloth which has been soaked in pure water or water in which neutral detergent has been diluted 100 times, and then wipe it evenly with a dry cloth of the same type until the surface is dry.
- Do not scratch or hit the surface of the panel with fingernails or other hard objects, otherwise the surface may become damaged. Furthermore, avoid contact with volatile substances such as insect sprays, solvents and thinner, otherwise the quality of the surface may be adversely affected.

If the cabinet becomes dirty, wipe it with a soft, dry cloth.

- If the cabinet is particularly dirty, soak the cloth in water to which a small amount of neutral detergent has been added and then wring the cloth dry. Use this cloth to wipe the cabinet, and then wipe it dry with a dry cloth.
- Do not allow any detergent to come into direct contact with the surface of the Display. If water droplets get inside the unit, operating problems may result.
- Avoid contact with volatile substances such as insect sprays, solvents and thinner, otherwise the quality of the cabinet surface may be adversely affected or the coating may peel off. Furthermore, do not leave it for long periods in contact with articles made from rubber or PVC.

Usage of a chemical cloth

- Do not use a chemical cloth for the panel surface.
- Follow the instructions for the chemical cloth to use it for the cabinet.

Wired LAN

When setting up the Display at a place, where electric statistic occurs often, take a sufficient anti-static measure before start using.

- When the Display is used at a location, where static electricity occurs often, such as on a carpet, communications of the wired LAN or DIGITAL LINK are disconnected more often. In that case, remove static electricity and the noise source that may cause problems with an antistatic mat, and re-connect the wired LAN or DIGITAL LINK.
- In rare cases, the LAN connection is disabled due to static electricity or noise. In that case, turn off the power of the Display and the connected devices once and then re-turn on the power.

The Display may not work properly due to strong radio wave from the broadcast station or the radio.

- If there is any facility or equipment, which outputs strong radio wave, near the installation location, set up the Display at a location sufficiently far from the source of the radio wave. Or, wrap the LAN cable connected to the DIGITAL LINK / LAN terminal by using a piece of metal foil or a metal pipe, of which is grounded at both ends.

Disposal

When disposing the product, ask your local authority or dealer about the correct methods of disposal.
Feature of This Unit

● This unit has a function to send the ID signal (hereafter referred to as [LightID], ID = Identifier) that represents a variety of information by blinking the LED light source (Backlight) rapidly. This allows the unit to send a variety of information to devices, such as a smartphone.

Attention
● Store small parts in an appropriate manner, and keep them away from young children.
● The part numbers of accessories are subject to change without notice. (The actual part number may differ from the ones shown above.)
● In case you lost accessories, please purchase them from your dealer. (Available from the customer service)
● Dispose the packaging materials appropriately after taking out the items.
Remote Control Batteries

1. Pull and hold the hook, then open the battery cover.

2. Insert batteries - note correct polarity (+ and -).

3. Replace the cover.

**Helpful Hint**
- For frequent remote control users, replace old batteries with Alkaline batteries for longer life.

**Precaution on battery use**

Incorrect installation of the batteries can cause battery leakage and corrosion that will damage the remote control transmitter.

Disposal of batteries should be in an environmentally friendly manner.

**Observe the following precaution:**

1. Batteries shall always be replaced as a pair. Always use new batteries when replacing the old set.
2. Do not combine a used battery with a new one.
3. Do not mix battery types (example: “Zinc Carbon” with “Alkaline”).
4. Do not attempt to charge, short-circuit, disassemble, heat or burn used batteries.
5. Battery replacement is necessary when remote control acts sporadically or stops operating the Display set.
6. Do not burn or breakup batteries.
7. Batteries must not be exposed to excessive heat such as sunshine, fire or the like.

Kensington security

The security slot of this unit is compatible with the Kensington security slot.

---

55-inch model

49-inch model

42-inch model
Connections

AC cord connection and fixing

Back of the unit

AC cord fixing

AC cord (supplied)

Plug the connector into the display unit.
Plug the connector until it clicks.

Note
● Make sure that the connector is locked on both the left and right sides.

Unplug the AC cord

Unplug the connector pressing the two knobs.

Note
● When disconnecting the AC cord, be absolutely sure to disconnect the AC cord plug at the socket outlet first.
● The supplied AC cord is for this unit exclusive use. Do not use this for other purposes.

Cable fixing

Note
● 3 clamps are supplied with this unit. Fix the cables at 3 locations using the holes for clamps as shown below.

If you need more clamps, purchase them from your dealer. (Available from the customer service)

55-inch model

● The positions of the holes are the same for 42-inch and 49-inch models.

1. Attach the clamper

Insert the clamper in a hole.

To remove from the unit:
Keep pushing both side snaps and pull out the clamper.

2. Bundle the cables

Set the tip in the hooks and tighten.

To loosen:
Keep pushing the knob and pull out the tip.
**Video equipment connection**

1. **PC IN:** PC Input Terminal
   - Connect to video terminal of PC, video equipment with “YPbPr / YCbCr” or “RGB” output.
   (see page 19)

2. **AUDIO1 IN:** Audio input terminal shared with DVI-D IN and PC IN
   (see page 18, 19)

3. **COMPONENT / RGB / VIDEO IN:** COMPONENT / RGB Video Input Terminal (R/Pr/Cr, B/Pb/Cs, G/Y)
   - Connect to video equipment with “YPbPr / YCbCr” or “RGB” output.
   (see page 21)
   - Composite Video Input Terminal (VIDEO)
   - Connect to video equipment with Composite signal output.
   (see page 20)

4. **AUDIO2 IN:** Audio Input Terminal shared with COMPONENT/RGB IN and VIDEO IN
   (see page 20, 21)

5. **AUDIO OUT:** Analogue Audio Output Terminal
   - Connect to audio equipment with analogue audio input terminal.
   (see page 24)

6. **AV IN** (HDMI 1, HDMI 2): HDMI Input Terminal
   - Connect to video equipment such as VCR or DVD player, etc.
   (see page 17)

7. **DVI-D IN, DVI-D OUT:** DVI-D Input / Output Terminal
   - Connect to video equipment with DVI-D output. Also, when displaying the picture by daisy chaining multiple displays, connect to the other display (DVI-D OUT).
   - The DVI-D output function is enabled only when the picture is displayed via DVI-D IN.
   (see page 18)

8. **USB:** USB Terminal
   - Connect the USB memory to use [USB media player]. Also, this can be used to supply power of up to 5V/1A to an external device when the picture is displayed.
   (see page 25, 84)

9. **DIGITAL LINK / LAN:** DIGITAL LINK Input / LAN Terminal
   - Connect to a device that sends video and audio signals via the DIGITAL LINK terminal.
   Alternatively, control the Display by connecting to Network.
   (see page 70, 71)
Before connecting

- Before connecting cables, carefully read the operating instructions for the external device to be connected.
- Turn off the power of all devices before connecting cables.
- Take note of the following points before connecting the cables. Failure to do so may result in malfunctions.
  - When connecting a cable to the unit or a device connected to the unit itself, touch any nearby metallic objects to eliminate static electricity from your body before performing work.
  - Do not use unnecessarily long cables to connect a device to the unit or to the unit body. The longer the cable, the more susceptible to noise it becomes. Since using a cable while it is wound makes it act like an antenna, it is more susceptible to noise.
  - When connecting cables, connect GND first, then insert the connecting terminal of the connecting device in a straight manner.
- Acquire any cable necessary to connect the external device to the system that is neither supplied with the device nor available as an option.
- If the outer shape of the plug of a connection cable is large, it may come in contact with the periphery such as a back cover or the plug of an adjacent connection cable. Use a connection cable with the suitable plug size for the terminal alignment.
- If video signals from video equipment contain too much jitter, the images on the screen may wobble. In this case, a time base corrector (TBC) must be connected.
- When the sync signals output from PC or video equipment are disturbed, for example, when changing settings of video output, the colour of the video may be disturbed temporarily.
- The unit accepts Composite video signals, YCbCr/YPbPr signals, analogue RGB signals and digital signals.
- Some PC models are not compatible with the unit.
- Use cable compensator when you connect devices to the unit using long cables. Otherwise the image may not display properly.
- Refer to “Preset Signals” (see page 92) for the types of video signals that can be displayed with the unit.

10 IR IN, IR OUT: Infrared Signal Input / Output Terminal
Use this when operating more than one display with one remote control.
(see page 24)

11 SERIAL IN, SERIAL OUT: SERIAL Input / Output Terminal
Control the Display by connecting to PC.
(see page 21)
HDMI 1 and HDMI 2 terminals connection

**Note**
- Video equipment and HDMI cable shown are not supplied with this unit.
- Some HDMI equipment may not be able to display picture.
- For audio, it is also possible to use AUDIO1 IN or AUDIO2 IN terminal input. (For [Audio input select] function, see page 64.)

---

1 HDMI cable (commercially available)
2 Video Cassette Recorder
3 DVD Player
4 PC
**DVI-D IN / DVI-D OUT terminal connection**

**Note**
- Video equipment and cables shown are not supplied with this unit.
- Use the DVI-D cable complying with the DVI standard. Image deterioration may occur depending on the length or the quality of the cable.
- DVI-D IN terminal is for Single Link only.
- For audio, it is also possible to use AUDIO2 IN terminal input. (For [Audio input select] function, see page 64.)

Shared with PC IN.

1. DVI-D video cable (Within 5 m) (commercially available)
2. Stereo mini plug (M3) cable (commercially available)
3. PC with DVI-D video out

**Daisy chain connection**

It is possible to daisy chain multiple displays when displaying the picture on multi screen, etc.

1. First display
2. Second display
3. Third display

**Note**
- It is possible to daisy chain up to 10 displays. However, the number of connectable displays may be limited depending on the cables, signals, the devices used, etc.
When inputting HDCP signal, it is possible to daisy chain up to 8 displays.

The DVI-D output function is enabled when the picture is displayed via DVI-D IN. When using the daisy-chain connection method, all the displays should be in the state where the picture is displayed via DVI-D IN.

</table>

Shared with DVI-D IN.

(Female)

(Male)

Connect a cable which matches the audio output terminal on the computer. (commercially available)

1 Mini D-sub 15p cable (commercially available)
2 Conversion adapter (if necessary) (commercially available)
3 Stereo mini plug (M3) cable (commercially available)
4 PC

The type of computer signal that can be connected

- With regard to the typical PC input signals that are described in “Preset Signals” (see page 92), adjustment values such as for the standard picture positions and sizes have already been stored in this unit.

(Computer signals which can be input are those with a horizontal scanning frequency of 30 to 110 kHz and vertical scanning frequency of 48 to 120 Hz.)

- The display resolution is a maximum of 1,440 × 1,080 dots when the aspect mode is set to [4:3], and 1,920 × 1,080 dots when the aspect mode is set to [16:9]. If the display resolution exceeds these maximums, it may not be possible to show fine detail with sufficient clarity.

- In [ENGLISH(US)] OSD language, [16:9] is displayed as [FULL].

Note

- The PC IN terminal is DDC2B-compatible. If the computer being connected is not DDC2B-compatible, you will need to make setting changes to the computer at the time of connection.
- There is no need to use an adapter for computers with DOS/V compatible Mini D-sub 15P terminal.
● The computer shown in the illustration is for example purposes only.
● Additional computer, cables and conversion adapter shown are not supplied with this set.
● Do not set the horizontal and vertical scanning frequencies for PC signals which are above or below the specified frequency range.
● Component Input is possible with the pin 1, 2, 3 of the Mini D-sub 15P Connector.
● Change the [Component/RGB-in select] setting in the [Signal] menu to [Component] (when Component signal connection) or [RGB] (when RGB signal connection). (see page 46)
● For audio, it is also possible to use AUDIO2 IN terminal input. (For [Audio input select] function, see page 64.)

VIDEO IN terminal connection

Note
● Video equipment, connection cables and conversion plugs are not supplied with this unit.
● For audio, it is also possible to use AUDIO1 IN terminal input. (For [Audio input select] function, see page 64.)

Shared with COMPONENT/RGB IN.

1 Video pin cable (commercially available)
2 Pin-BNC conversion plug (commercially available)
3 Stereo audio cable (commercially available)
4 Video Cassette Recorder
5 DVD Player
**COMPONENT/RGB IN terminal connection**

*Note*
- Video equipment, cables and conversion adapter shown are not supplied with this unit.
- For audio, it is also possible to use AUDIO1 IN terminal input. (For [Audio input select] function, see page 64.)

Shared with VIDEO IN.

<table>
<thead>
<tr>
<th>COMPONENT/RGB/VIDEO IN</th>
<th>AUDIO2 IN</th>

</tbody>
</table>

- **1** Video pin cable (commercially available)
- **2** Pin-BNC conversion plug (commercially available)
- **3** Stereo audio cable (commercially available)
- **4** DVD Player
- **5** RGB camera

*Note*
- In accordance with the input signal connected to COMPONENT/RGB IN terminal, select the input [Component] or [RGB] in [Signal] - [Component/RGB-in select]. (see page 46)
- The RGB signal input to COMPONENT/RGB IN terminal corresponds to “SYNC ON G” only.

**SERIAL terminal connection**

The SERIAL terminal conforms to the RS-232C interface specification, so that the Display can be controlled by a computer which is connected to this terminal.

*Note*
- Additional computer and cables shown are not supplied with this set.

![Diagram](image)

- **1** RS-232C Straight cable (commercially available)
- **2** PC

*Note*
- Use the RS-232C straight cable to connect the computer to the Display.
- For serial control, make sure to set [Network settings] - [Serial control] to [SERIAL IN]. (see page 54)
It is possible to daisy chain multiple displays, and then control the specific display with PC.

**Note**
- When daisy chaining, set [Options] - [Serial daisy chain position]. (see page 67)
- When daisy chaining, use a straight cable which pin No. 6 to 8 are hard wired.

### Pin assignments and signal names for SERIAL Terminal

<table>
<thead>
<tr>
<th>Pin No.</th>

</tr>
</tbody>
</table>

These signal names are those of computer specifications.

**Communication parameters**
- Signal level: RS-232C compliant
- Synchronization method: Asynchronous
- Baud rate: 9600 bps
- Parity: None
- Character length: 8 bits
- Stop bit: 1 bit
- Flow control: None
Basic format for control data

The transmission of control data from the computer starts with a STX signal, followed by the command, the parameters, and finally an ETX signal in that order. If there are no parameters, then the parameter signal does not need to be sent.

```
STX  C1  C2  C3  :  P1  P2  P3  P4  P5  ETX
```

- **Start** (02h)
- **Colon**
- **End** (03h)

3-character command (3 bytes)

</tbody>
</table>

**Note**

- If multiple commands are transmitted, be sure to wait for the response for the first command to come from this unit before sending the next command. When sending a command which does not require parameter, a colon (:) is not needed.
- If an incorrect command is sent by mistake, this unit will send an “ER401” command back to the computer.
- In Standby condition (power OFF with remote control), the unit responds to PON command only.
- Consult your local Panasonic dealer for detail instructions on command usage.

For more details, visit the following web site.
http://panasonic.net/prodisplays/
**IR IN/IR OUT terminal connection**

Connect the mini plug (M3) cable from the IR OUT terminal of the first display to the IR IN terminal of the second display.

The infrared signal of the first display is sent to the second display.

In this case, the IR (infrared ray reception on the remote control sensor) on the second display does not operate.

Repeating the above connections enables the daisy chain connection.

**Note**
- Connection cables are not supplied with this unit.
- Daisy chain connection is possible only between the displays of the same series.

**AUDIO OUT terminal connection**

**Note**
- Audio equipment and the cable shown are not supplied with this set.

- To output sound from AUDIO OUT terminal of the unit, be sure to set [Output select] in the [Sound] menu to [AUDIO OUT]. (see page 39)

1. Stereo mini plug (M3) cable (commercially available)
2. Audio equipment

2. Stereo audio cable (commercially available)
3. Audio equipment

2. L
3. R
4. line-in

1. Stereo audio cable (commercially available)
2. First display
3. Second display
4. Third display
USB terminal connection

Connect the USB memory (commercially available) to use [USB media player]. (see page 84)
Also, power is supplied when a separately sold stick PC, etc. are connected.

**Note**
- A stick PC and connection cables are not supplied with this unit.

Power of up to 5V/1A can be supplied to an external device when the picture is displayed.
- If the electric current exceeding the power supplying capability is applied, the output is blocked, and the following message is displayed.
  [USB DC5V OUT overload. Please remove cable or equipment, then turn the display off/on.]
  In this case, remove the equipment and then turn the power off/on using the remote control, etc.

**Note**
- If the direct connection to this unit is not possible due to the size of a stick PC, etc. use a commercially sold extension cable.
- Depending on the type of a USB memory device, it may come in contact with the periphery such as a back cover, and cannot be attached. Use a commercially sold extension cable, or use a small type of a USB memory device connectable to this unit.
- Depending on the USB memory, the access lamp may remain blinking even when it is not being accessed. In this case, remove the device after switching to the input other than USB.
  Also, when data cloning is running, remove the device after the screen to notify it is finished is displayed. (see page 95)

1 Stick PC
2 USB cable (commercially available)
3 HDMI extension cable (commercially available)
DIGITAL LINK terminal connection

Twisted pair cable transmitters such as the Panasonic Digital Interface Box (ET-YFB100G) or the DIGITAL LINK Switcher (ET-YFB200G) use twisted pair cables to transmit inputted video and audio signals, and these digital signals can be input to the Display via the DIGITAL LINK terminal.

![Diagram of connections and components](image)

Note

- When connecting with DIGITAL LINK, be sure to configure each of the [Network settings] settings. (see page 54)
- For the cautions for DIGITAL LINK setting and connection, see page 71.
- Corresponding signal for DIGITAL LINK input is the same as that of HDMI input. (see page 92)
- For audio, it is also possible to use AUDIO1 IN or AUDIO2 IN terminal input. (For [Audio input select] function, see page 64.)

1. PC to control the unit
2. Example: Panasonic ET-YFB100G
3. PC
4. Video Cassette Recorder
5. DVD Player
Identifying Controls

Main Unit

1. To take out/store the power indicator and remote control sensor, operate the lever on the rear panel. It is also possible to press the remote control sensor directly to store.

**Note**

- For normal use, pull out the power indicator and remote control sensor from the edge side of the main unit by operating the lever on the rear panel. Depending on the setup condition such as when using the multi display, store them in the main unit.

1. **Power Indicator / Remote control sensor**

   The Power Indicator will light.

   - **When the power of the unit is ON (Main Power On / Off button: ON)**
     - Picture is displayed: Green
     - Power OFF (Standby) with remote control:
       - When [Network control] is set to [Off]: Red
       - When [Network control] is set to [On]: Orange (Red/Green)
     - About [Network control] settings, see page 54.
     - Power OFF with “Power management” function (see page 50): Orange (Red/Green)

   - **When the power of the unit is OFF (Main Power On / Off button: OFF): No light**

   **Note**

   - The unit will still consume some power as long as the power cord is still inserted into the wall outlet.
   - When the power indicator is orange, power consumption during standby is generally larger than that of when the power indicator is red.

1. **External Input / Output Terminal**

   - Connects to video equipment, PC, etc. (see page 15)

2. **<Main Power On / Off button>**

   - Turns the power On / Off.

3. **<INPUT (Unit)> (INPUT signal selection)**

   - Selects the connected device. (see page 31)

4. **<MENU (Unit)>**

   - Each time the <MENU (Unit)> button is pressed, the menu screen will switch. (see page 35)

5. **<+ (Unit)> / < (Unit)>**

   - Adjusts the volume. (see page 32)
   - On the main screen, switches settings or adjusts settings level. (see page 35)

6. **<▲ (Unit)> / < ▼ (Unit)>**

   - Selects the setting item. (see page 35)

7. **<ENTER (Unit)>**

   - Configures the item on menu screen. (see page 35)
   - Switches aspect mode. (see page 33)

8. **Built-in speakers**

   **Note**

   - To output sound from the built-in speakers of the unit, be sure to set [Output select] in the [Sound] menu to [SPEAKERS]. (see page 39)

</tbody>
</table>

The operation is mainly explained indicating the remote control buttons but you can also operate with the buttons on the unit when there are the same buttons.
Basic Controls

1 Connect the AC cord plug to the Display.
(see page 14)

2 Connect the plug to the socket outlet.
( Note )
- Main plug types vary between countries. The power plug shown at left may, therefore, not be the type fitted to your set.
- When disconnecting the AC cord, be absolutely sure to disconnect the AC cord plug at the socket outlet first.
- The settings may not be saved if the power plug is disconnected immediately after changing settings with on-screen menu. Disconnect the power plug after a enough period of time. Or, disconnect the power plug after turning the power off with the remote control, RS-232C control or LAN control.

3 Press the <Main Power On / Off button> on the unit to turn the set on: Power-On.
- Power Indicator: Green (Picture is displayed.)
- When the power of the unit is ON, remote control operation is possible.

To turn the power ON/OFF with the remote control

Press the <Standby (ON/OFF) button> to turn the Display on.
- Power Indicator: Green (Picture is displayed.)

Press the <Standby (ON/OFF) button> to turn the Display off.
- Power Indicator: Red (standby)

Press the <Main Power On / Off button> on the unit to turn the unit off, when the power of the unit is turned on or in standby mode.
( Note )
- During operation of the “Power management” function (see page 50), the power indicator turns orange in the power off state.

Note

- For normal use, pull out the remote control sensor from the edge side of the main unit by operating the lever on the rear panel. (see page 27)
- Do not put an obstacle between the remote control sensor of the main unit and the remote control.
- Operate the remote control in front of the remote control sensor or from the area where the sensor can be seen.
- When directly aiming the remote control at the remote control sensor of the main unit, the distance from the front of remote control sensor should be approx. 7 m or less. Depending on the angle, the operation distance may be shorter.
- Do not subject the remote control sensor of the main unit to the direct sunlight or strong fluorescent light.

Remote Control Sensor / Power Indicator

Operate pointing the remote control directly at the unit’s Remote Control Sensor.
When the Unit is turned on for the first time
Following screen will be displayed.

Note

- Once the items are set, the screens won’t be displayed when switching on the unit next time.
- Each item can be reset in the following menus.
  - [OSD language] (see page 52)
  - [Date and time] (see page 54)
  - [Display orientation] (see page 59)

Power ON message

The following message may be displayed when turning the unit power ON:

No activity power off Precautions

- ’No activity power off’ is enabled.

When [No activity power off] in the [Setup] menu is set to [Enable], a warning message is displayed every time the power is turned ON. (see page 52)

“Power management” Information

- Last turn off due to ’Power management’.

When “Power management” is functioned, an information message is displayed every time the power is turned ON. (see page 50)

These message displays can be set with the following menu:
  - [Options] menu
    - Power on message(No activity power off) (see page 68)
    - Power on message(Power management) (see page 68)
Selecting the input signal

Select the signals input to the unit. Press <INPUT> or <INPUT (Unit)>.

Switches input every time the buttons are pressed.

[HDMI1] → [HDMI2] → [DIGITAL LINK] → [DVI-D] → [PC] → [COMPONENT]* → [VIDEO] → [USB]

[HDMI1]:
HDMI 1 terminal, HDMI input

[HDMI2]:
HDMI 2 terminal, HDMI input

[DIGITAL LINK]:
DIGITAL LINK / LAN terminal, DIGITAL LINK input

[DVI-D]:
DVI-D IN terminal, DVI-D input

[PC]:
PC IN terminal, PC input

[COMPONENT]*:
COMPONENT/RGB IN terminal, Component input

[VIDEO]:
VIDEO terminal, composite video input

[USB]:
USB terminal, USB input

*: [COMPONENT] may be displayed as [RGB] depending on the settings of [Component/RGB-in select]. (see page 46)

( Note )
• Displays the signal name as set in [Input label]. (see page 50)
• Input will not be switched unless [Input lock] is set to [Off]. (see page 65)
• Image retention (image lag) may occur on the liquid crystal panel when a still picture is kept on the panel for an extended period. To prevent such a problem, using the screensaver and wobbling is recommended. (see page 49, 52)

RECALL

It is possible to check the setting status of input label, picture mode, etc. Press <RECALL>.

Current setting status will be displayed.

1 Input label
2 Aspect mode (see page 33)
3 Backup input change (see page 62, 64)
4 Audio input (see page 64)
5 Profile name (see page 45)
6 Off timer remaining time (see page 32)
7 Clock / Mute (see page 32)

● The followings are displayed for about 30 seconds at the end: [No signal] - when there is no video signal to the selected input, [No external media] - when a USB memory is not connected to the USB terminal at the time of using the USB input.
● To display the clock, set [Date and time], and then set [Clock display] to [On]. (see page 54, 68)
**Volume Adjustment**

Press <VOL +> <VOL -> or <+ (Unit)> <- (Unit)> to adjust volume.

- The current sound volume level is memorised even if the power is turned off.
- When [Maximum VOL level] is set to [On], the volume can only be adjusted to the maximum point you set, and the displayed value turns red when it reached its maximum. (see page 65)
- When [Initial VOL level] is set to [On], the volume will be at the set level when the display is turned on. (see page 64)

**Sound mute On / Off**

It is useful when you want to mute the sound temporarily, for example, when answering the phone or door.

Press <MUTE>.

- Mute appears on the screen and the sound is muted. Press again to reactivate the sound.

- It is also reactivated when the power is turned on / off or the volume level is changed.
- While MUTE is active, is displayed as a reminder after operation.
- In [ENGLISH(US)] OSD language, is displayed as [MUTE].

**OFF TIMER**

The Display can be preset to switch to stand-by after a fixed period. (30 min, 60 min, 90 min)

The setting switches each time <OFF TIMER> is pressed.

- [0 min] → [30 min] → [60 min] → [90 min]
  → [0 min] (Cancel)

- When three minutes remain, the remaining time will flash (Red). After that, it switches to stand-by.
- To see the Off timer remaining time, press <RECALL>.
- The Off timer is cancelled if a power interruption occurs. When the power is turned on later on, it will be in stand-by condition.
Press <ASPECT> or <ENTER (Unit)> repeatedly to move through the aspect options:

[4:3] → [Zoom1] → [Zoom2] → [16:9]

**Note**

- The aspect mode is memorised separately for each input terminal.
- When input from USB, the aspect mode is fixed to [16:9].

### List of Aspect Modes

<table>
<thead>
<tr>
<th>Aspect mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>16:9</td>
<td>Pictures are displayed filling the screen.</td>
</tr>
<tr>
<td>4:3</td>
<td>Pictures are displayed in the 4:3 area. Pictures with a 4:3 aspect ratio are displayed as is. PC signals are enlarged or reduced to be displayed in the 4:3 area. Side panels are displayed both at the right and left edges of the screen. Pictures with a 4:3 aspect ratio in 16:9 signals are displayed with their original aspect ratio. The left and right edges of the pictures are masked by side panels.</td>
</tr>
</tbody>
</table>

**Aspect mode**

<table>
<thead>
<tr>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>[Zoom1]</td>
</tr>
<tr>
<td>[Zoom2]</td>
</tr>
</tbody>
</table>

**Note**

- Do not allow the picture to be displayed in 4:3 mode for an extended period, as this can cause a permanent image retention to remain on the liquid crystal panel.
- Be aware that if you put the display in a public place for commercial purposes or a public showing and then use the aspect mode select function to shrink or expand the picture, you may be violating the copyright under copyright law. It is prohibited to show or alter the copyrighted materials of other people for commercial purposes without the prior permission of the copyright holder.
- In [ENGLISH(US)] OSD language, [16:9] is displayed as [FULL].
Digital ZOOM

Select the screen areas (25 areas) to zoom in, and zoom in the selected image areas ×2, ×3 or ×4.

1 Set the digital zoom mode.
Press <ZOOM>.

The screen aspect is set to [16:9], and the digital zoom operation guide is displayed.

2 Select the image areas to zoom in.
Select pressing ▼ ▲ ◄ ►.

Digital Zoom operation guide

3 Switch the zoom ratio for the screen areas.
Switches every time <ENTER> is pressed.

- If no operation is performed for approx. 60 seconds when the zoom ratio for the screen is “×1”, the unit exits the zoom mode.
- If no operation is performed for approx. 3 seconds when the zoom ratio for the screen is “×2”, “×3” or “×4”, the digital zoom operation guide display disappears. Pressing any of the ▼ ▲ ◄ ► buttons displays the guide again.

4 Exit the digital zoom mode.
Press <RETURN> to exit the mode.
The screen returns to the previous state just before entering the digital zoom mode, and the digital zoom operation guide display disappears.
- Press any of the following buttons to exit the mode. Then, the operation of the pressed button is performed.
  - Remote Control:
    <AUTO SETUP> <POSITION> <PICTURE>
    <INPUT> <SETUP> <SOUND>
    <DEFAULT> <RECALL> <MUTE>
    <ASPECT> <OFF TIMER> <FUNCTION>
    <VOL +> <VOL -> <1>-<6>
  - Unit:
    <INPUT (Unit)> <MENU (Unit)> <+ (Unit)>
    <- (Unit)> ▲▼ <ENTER (Unit)>
- When the screen saver timer starts up, the digital zoom mode finishes.
- When the power is turned OFF, a force-quit is performed.
  - When the power is turned OFF by pressing the <Standby (ON/OFF) button>.
  - When the display is turned OFF at the <Main Power On / Off button>.
  - When the power is turned OFF by the off-timer
  - When the power is turned OFF by [No signal power off] or [Power management].

Note
- In the following cases, the digital zoom mode is not available.
  - When [Multi display setting] is [On]
  - When the screen saver is in operation
  - When USB input is selected.
- The zoomed image is rougher than the original image.
- For multi display use, use the functions in [Multi display settings]. (see page 52)
On-Screen Menu Displays

1 Display the menu screen.

Remote Control

[Image of remote control with buttons labeled: Menu, Input, Auto Setup, Sound]

Press to select.

Unit

Press for several times.

Each time the button is pressed, the menu screen will switch.

Normal Viewing → [Picture] → [Setup] → [Position] → [Sound]

2 Select the item.

[Image of remote control with buttons labeled: Up, Down, Left, Right, Enter]

1 Press to select.

2 Press.

(Example: [Picture] menu)

<td></td>
</tr>
<tr>
<td>Dot clock</td>
<td>0</td>
<td>Off</td>
</tr>
<tr>
<td>1:1 pixel mode</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

2. Select the item to adjust with ▲▼.
   - Unadjustable items are greyed out. Adjustable items differ depending on the signal, input and the display mode.

3. Adjust with ◀▶.

4. Press <POSITION> to exit from adjust mode.

- To return to the previous screen
  Press <RETURN>.

- To reset to defaults
  Press <DEFAULT> while the menu is displayed, or press <ENTER> when [Default] is selected, then the settings will be set to factory settings.

( Note )
- Settings for [Position] are memorised separately for each input signal.

Setting [Position] when the display is installed vertically
When adjusting, please note that even when the display is installed vertically, setting directions of position / size are the same as that of horizontal installation.

Auto setup
When inputting a PC signal, [H-position] / [V-position], [H-size] / [V-size], [Clock phase] and [Dot clock] are automatically corrected.

This setting is enabled under the following condition:
- When inputting from PC IN or RGB IN

While displaying the picture of the corresponding signal, select [Auto setup] and press <ENTER>.

Using Remote Control
- Press <AUTO SETUP>.
  When Auto Setup does not work, [Invalid] is displayed.

Auto mode
When the [PC auto setting] is set to [On] in the [Options] menu (see page 66), automatic position adjustment starts under the following conditions:
- When the display power is turned ON.
- When the input signal is switched.

( Note )
- When the dot clock frequency of a PC signal is 162 MHz or higher, [Clock phase] and [Dot clock] cannot be automatically corrected.
- Auto Setup may not work when a cropped or dark image is input. In such case, switch to a bright image with borders and other objects are clearly shown, and then try auto setup again.
- Depending on the signal, out of alignment may occur after Auto Setup. Carry out fine tuning for the position/size as required.
- If Auto Setup cannot set properly for XGA signal (1024×768, 1280×768, 1366×768), pre-selecting the individual signal in [XGA mode] (see page 47) may results in correct Auto Setup.
- Accurate auto setup is not possible when a signal such as additional information is superimposed out of valid image period or when intervals between synchronizing signal and image signal are short. Also, accurate auto setup is not possible when image signals with tri level synchronizing signal added, or when some SYNC ON G signals are input.
- If Auto Setup does not work well, select [Default], press <ENTER>, and then adjust the position/size manually.
[H-position] Adjust the horizontal position with ▶️.

[H-size] Adjust the horizontal size with ▶️.

[V-position] Adjust the vertical position with ▶️.

[V-size] Adjust the vertical size with ▶️.

[Clock phase] (For RGB IN or PC IN input)
In some cases, frame of the screen appears blurred or smudged, when RGB signal or PC signal are input.

[Dot clock] (For RGB IN or PC IN input)
Periodic striped pattern interference (noise) may occur when a striped pattern is displayed. If this happens, adjust so that any such noise is minimized.

[Over scan] Turn image over scan On/Off.

**Applicable input signal:**
525i, 525p, 625i, 625p, 750/60p, 750/50p
(Component Video, RGB, DVI-D, HDMI)

**Note**
- When [Off] is set, [H-size] and [V-size] cannot be adjusted.

[1:1 pixel mode] Adjusts the display size when 1125i or 1125p signal is input.

**Applicable input signal:**
1125 / 50i, 60i, 24PsF, 24p, 25p, 30p, 50p, 60p

**Note**
- Select [Off] when flickering is shown around the image.
- [H-size] and [V-size] cannot be adjusted when [On] is selected.

Note
- In some cases, noise appears outside the area picture is displayed, but it is not a malfunction.
**Sound Adjustment**

1. Press <SOUND> to display the [Sound] menu.

2. Select the item to adjust with ▲▼.
   - Menu that cannot be adjusted is greyed out.

3. Adjust with ◀▶.

4. Press <SOUND> to exit from adjust mode.

- **To return to the previous screen**
  Press <RETURN>.

- **To reset to defaults**
  Press <DEFAULT> while the menu is displayed, or press <ENTER> when [Default] is selected, then the settings will be set to factory settings.

2 Select the item to adjust with ▲▼.
   - Menu that cannot be adjusted is greyed out.

3 Adjust with ◀▶.

4 Press <PICTURE> to exit from adjust mode.

Note
- When displaying still picture with USB input (USB media player), only the following settings have an effect on the picture:
  - [Backlight], [Gamma], [Colour temperature]

[Picture mode]
This menu switches to easy-to-see pictures suitable to the picture source or environment where this unit is used.

[Vivid signage]
Suitable for signage applications featuring more vivid and sharper images in bright environments such as a shop.

[Natural signage]
Suitable for signage applications such as merchandise exhibition, featuring natural tone images with colour reproduction emphasized under light.

[Standard]
Faithfully reproduces original picture.

[Surveillance]
Tone-focused pictures with brightness reduced suitable for input from a monitoring camera.

[Graphic]
Suitable for PC input.

[DICOM]
Pictures close to the grayscale standard DICOM Part14.

- The settings are memorised separately for each input terminal.

Note
- DICOM is the abbreviation for “Digital Imaging and Communications in Medicine”, which is a standard for communications between medical imaging devices. Although “DICOM” is used as a picture mode name, this unit is not a medical device. Do not use displayed images for such purposes as diagnosis.

   - Darker ↔ Brighter

Note
- If [Setup] - [LightID] is set to [External control] or [Internal ID], 3 levels of adjustment is available, which are [High], [Mid] and [Low].

[Contrast] Selects the proper brightness and density for the room.
   - Less ↔ More

- In [ENGLISH(US)] OSD language, [Contrast] is displayed as [PICTURE].
**[Brightness]** Adjusts for easier viewing of dark pictures.
   Darker ↔ Brighter

**[Colour]** Adjusts colour saturation.
   Less ↔ More

**[Hue]** Adjusts hue of skin colour.
   Reddish ↔ Greenish
   - In [ENGLISH(US)] OSD language, [Hue] is displayed as [TINT].

**[Sharpness]** Adjusts picture sharpness.
   Less ↔ More

**[Enhance level]** Switches the effect range for sharpness.
   - [High]:
     Large effect
   - [Low]:
     Small effect

**[Gamma]** Adjusts gamma.
   - [2.0], [2.2], [2.4], [2.6], [DICOM]:
     Small tilt - Large tilt

**Note**
   - When [DICOM] is selected in [Picture mode], [Gamma] is fixed to [DICOM].
     When the items other than [DICOM] are selected in [Picture mode], [DICOM] cannot be set for [Gamma].

**[Colour temperature]** Adjusts colour tone.
   - [3200K], [4000K], [5000K], [6500K], [7500K], [9300K], [10700K], [Native], [USER1], [USER2]

**Note**
   - Emphasizes red when the numerical value of [Colour temperature] is small, and emphasizes blue when it is big.
   - [Native] is a colour tone of the panel element. When this is selected, [Gamma] is fixed to 2.2 or equivalent and it cannot be adjusted.
   - When [DICOM] is selected in [Picture mode], only [6500K] and [9300K] can be selected.

**User setting of [Colour temperature]**
   - 2 kinds of detailed [Colour temperature] settings ([USER1] and [USER2]) can be stored.

---

1. Press <ENTER> while setting [Colour temperature].

   ![Enhance level](image)

   Example:
   When [Colour temperature] is [6500K], it is possible to reflect the set point, [6500K], to the set point of [USER1] and [USER2].

2. Select the user to memorise settings with ▲▼ and press <ENTER>.

   ![Adjust colour temperature](image)

   ![Adjust colour temperature](image)

4. Set each item on detail settings screen.

   ![Adjust colour temperature](image)

   **[R gain]**
   Adjusts the white balance for light red areas.
   - 0 to 255

   **[G gain]**
   Adjusts the white balance for light green areas.
   - 0 to 255

   **[B gain]**
   Adjusts the white balance for light blue areas.
   - 0 to 255

   **[R bias]**
   Adjusts the white balance for dark red areas.
   - -127 to 128
[G bias] Adjusts the white balance for dark green areas.
-127 to 128

[B bias] Adjusts the white balance for dark blue areas.
-127 to 128

The settings are saved for the user. When you return to [Picture] menu, the user you have set is selected for [Colour temperature].

[6-segment colour management] Adjusts the colour tone of R (red), G (green), B (blue) and complementary colours (cyan, magenta and yellow) on the screen individually.

1 Set [6-segment colour management] to [On], and then press <ENTER>.

2 Set each item on detail settings screen.

[Dynamic contrast] Automatically adjusts the contrast by determining the changes in the use of colours for images that constantly change, such as motion pictures.
No effect ↔ Large effect

[Colour enhancement] Displays images by emphasising colours.
[Off], [Low], [Mid], [High]
(Small effect to Large effect)

[Refine enhancer] Enhances the sense of resolution by correcting fuzzy outlines of pictures resulted from resizing, etc.
[Off], [Low], [Mid], [High]
(Small effect to Large effect)

[Gradation smoother] Extracts and eliminates noise components from the input video signals, and then displays noiseless pictures.
[Off], [On]

- In [ENGLISH(US)] OSD language, [Hue] is displayed as [TINT].
Picture Profiles

Up to 6 combinations of picture adjustment values (in the [Picture] menu) can be stored in the display memory as profiles and applied as needed, for a convenient way to enjoy your preferred picture settings.

### Overview of Picture Profiles

#### Original picture

Adjust picture.

(see page 40 - 42)

#### Custom picture

Example:

Save the picture adjustment values in the [MEMORY1] profile.

[Memory save]

Original picture

Example:

Load [MEMORY1].

[Memory load]

#### [Memory save] screen

Example:

Change the memory name to [MY PICTURE].

[Memory edit]

(see page 44)

#### [Memory edit]

(see page 45)
Saving profiles

Follow these steps to save picture adjustment values as profiles.

1 Specify the picture quality in the [Picture] menu.
(see page 40 - 42)

2 In the [Picture] menu, select [Memory save] with ▲▼ and press <ENTER>.

3 Select a profile name for saving the picture adjustment values with ▲▼ and press <ENTER>.

4 Select [Ok] with ▲▼ and press <ENTER>.

5 Enter a profile name with ▲▼ ▲▼.

Loading profiles

Load profiles and apply the picture adjustment values to the display as follows.

1 In the [Picture] menu, select [Memory load] with ▲▼ and press <ENTER>.

2 Select the profile to load with ▲▼ and press <ENTER>.

Loading profiles using numeric buttons on the remote control.

Each numeric button <1> - <6> is allocated for loading [MEMORY1] to [MEMORY6].

[Function button settings] (see page 58)

1 Press any of <1> - <6>.

2 Select [Ok] with ▲▼ and press <ENTER>.
When profile is being loaded, profile name is displayed.

Note
● Loaded profiles are stored in memory according to the selected input terminal.

Editing profiles
Delete or rename profiles as follows.

■ Deleting profiles
1 In the [Picture] menu, select [Memory edit] with ▲▼ and press <ENTER>.

2 Select [Memory delete] with ▲▼ and press <ENTER>.

3 Select the profile to delete with ▲▼ and press <ENTER>.

4 Select [Ok] with ▲▼ and press <ENTER>.

■ Renaming profiles
1 In the [Picture] menu, select [Memory edit] with ▲▼ and press <ENTER>.

2 Select [Memory name change] with ▲▼ and press <ENTER>.

3 Select the profile to rename with ▲▼ and press <ENTER>.

4 Enter a name for the profile with ▲▼.
  ● Entering characters (see page 91)

5 When you finished entering the profile name, select [Ok] with ▲▼ and press <ENTER>.
  ● To cancel renaming the profile, select [Cancel].
Setup menu

1 Press <SETUP> to display the [Setup] menu.

2 Select the item to set with ▲▼.
   ● Menu that cannot be adjusted is greyed out.
   Adjustable menu changes depending on signal, input and menu setting.

3 Set with ◀▶.

4 Press <SETUP> to exit from adjust mode.

   To return to the previous screen
   Press <RETURN>.

Note

● [Signal] setup menu displays a different setting condition for each input signal.
● Menu that cannot be adjusted is greyed out.
**[Component/RGB-in select]**
This menu is displayed at PC IN and COMPONENT/RGB IN inputs.
Select to match the signals from the source connected to each terminal.

- **[Component]**: YPbPr/YCbCr signals
- **[RGB]**: RGB signals

**Note**
- Set for each input terminal (COMPONENT/RGB IN, PC IN).

**[YUV/RGB-in select]**
This menu is displayed at HDMI 1, HDMI 2, DIGITAL LINK and DVI-D IN inputs.
Select to match the signals from the source connected to each terminal.

- **[YUV]**: YUV signals
- **[RGB]**: RGB signals

**Note**
- Set for each input terminal (HDMI 1, HDMI 2, DIGITAL LINK, DVI-D IN).

**[Sync]**
This menu is displayed at PC IN input.

**Setting RGB/PC sync signal**

- **[Auto]**:
  The H and V sync or synchronized signal is automatically selected. When both of them have sync signal, H and V sync will be selected.
  When displaying CS signal, connect to HD input terminal.

- **[on G]**:
  Uses a synchronized signal on the Video G signal, which is input from the G connector.

- **[HV sync]**:
  Uses a synchronized signal on the Video HD/VD signal, which is input from the HD/VD connector.

**Setting Component sync signal**

- **[Auto]**:
  The H and V sync or synchronized signal is automatically selected. When both of them have sync signal, H and V sync will be selected.
  When displaying CS signal, connect to HD input terminal.

- **[on Y]**:
  Uses a synchronized signal on the Video Y signal, which is input from the Y connector.

- **[HV sync]**:
  Uses a synchronized signal on the Video HD/VD signal, which is input from the HD/VD connector.

**[Cinema reality]**
Faithfully reproduces videos shot with cinema films. Set this to [Off] normally.

**Note**
- In [ENGLISH(US)] OSD language, [Cinema reality] is displayed as [3:2 PULLDOWN].
- If [Cinema reality] is set to [On], videos including movies shot at 24 frames per second are reproduced more naturally.
- If the video is unnatural with [On] set, set it to [Off].

**[Noise reduction]**
Reduces picture noise.

- **[Off]**: Disables Noise Reduction.
- **[Min]**, **[Mid]**, **[Max]**: Sets strength of Noise Reduction.

- **[Auto]**:
  Noise reduction will be automatically selected from [Min], [Mid] or [Max].

**[MPEG noise reduction]**
Reduces block noise and mosquito noise on MPEG videos.

- **[Off]**: Disables Noise Reduction.
- **[Min]**, **[Mid]**, **[Max]**: Sets strength of Noise Reduction.

**[XGA mode]**
This menu is displayed at PC IN and COMPONENT/RGB IN inputs.
This unit supports XGA signals (1024 × 768, 1280 × 768, 1366 × 768) having different aspect ratios and sampling rates.

- **[Auto]**:
  Automatically detects the signal.
  Switch the setting to suit the input signal for better display depends on the angle of view or display resolution condition.

**Note**
- After making this setting, be sure to make each adjustment (such as [Auto setup]) on the [Position] menu as necessary. (see page 37)
[Signal range]
This menu is displayed at HDMI1, HDMI2, DIGITAL LINK and DVI-D IN inputs. Switches the dynamic range to match the signals from the source connected to each terminal.

[Video(16-235)]:
If the input signal is the video range
Example: HDMI terminal output for DVD player

[Full(0-255)]:
If the input signal is full range
Example: HDMI terminal output for personal computer

[Auto]:
Switches the dynamic range automatically between [Video(16-235)] and [Full(0-255)] according to the input signal.

Note
- [Auto] can be selected when the HDMI/DIGITAL LINK signal input.

[Input level]
This menu is displayed at PC IN, COMPONENT/RGB IN and VIDEO IN inputs.
Adjustment of parts which are extremely bright and hard to see.

- 16 to + 16:
  (Level low) - (Level high)

[3D Y/C filter]
Set this if the video looks unnatural at VIDEO IN input. Set this to [On] normally.

( Note )
- Depending on the signalling system, this setting may be less effective or may not be effective at all.

[Colour system]
Sets the colour system according to the signal method at VIDEO IN input. Set this to [Auto] normally. This automatically detects the input signal format.

[Auto], [PAL], [SECAM], [NTSC], [NTSC 4.43], [PAL M], [PAL N]:
Set this to [Auto] when viewing PAL-60 videos.

When images are unstable
When the system is set to [Auto], images become unstable in rare case under the condition that the input signals are at low level or have many noises. In this case, set the system so it conforms with the input signal format.

[Dynamic backlight control]
Improves picture contrast and alleviates whiteness by controlling the back light when signals with the low average brightness level (APL) are input.

[On]:
The function is enabled.

[Off]:
The function is disabled.

Note
- When [Setup] - [LightID] is set to [External control] or [Internal ID], the setting of this function is fixed to [Off].
- When this function is operating, the on-screen brightness becomes lower.
- If the [Dynamic backlight control] setting is different for each input, the on-screen brightness may change by switching input.
- Depending on the displayed image, the screen may flicker. If this bothers you, set [Dynamic backlight control] to [Off].

[Input signal display]
Displays the frequency and the type of the current input signal.

| H-freq. | 33.72 kHz |
| V-freq. | 60.00 Hz |
| Dot clock freq. | 74.18 MHz |
| Signal format | 1125(1080)/60i |

Display range:
Horizontal (15 kHz - 135 kHz)
Vertical (24 Hz - 120 Hz)

The dot clock frequency is displayed when Digital and PC signal are input.
**Screensaver**

(For preventing image retention)

Do not display a still picture, especially in 4:3 mode, for any length of time.

If the display must remain on, a Screensaver should be used.

[| Screensaver | - submenu screen |
---|---|---|
Start | 2019/01/01 | FRIDAY 10:00 |
Mode | Off |
---|---|---|

**Screensaver settings**

**Screensaver operation**

When the Screensaver is operating, the following 5 patterns are displayed full screen for 5 seconds each, and it will be repeated.  
Black → Dark grey → Grey → Light grey → White → Light grey → Grey → Dark grey

**To start Screensaver now**

2. Select [Start] and press <ENTER>.
   - The Screensaver will be activated.

**Note**

- If the following buttons are pressed while the screen saver is operating, the screen saver is cancelled.
  - Remote control: <RETURN>
  - Main unit: <MENU (Unit)> <INPUT (Unit)> <+ (Unit)> < (Unit)> <ENTER (Unit)>
  - When the display is turned off, the Screensaver will be deactivated.

**To set interval of Screensaver**

1. Select [Interval] in [Mode].
2. Set [Periodic time].
   - Press ▲▼ to change the time by 15 minutes.
   - In [ENGLISH(US)] OSD language, [Periodic time] is displayed as [SHOW DURATION].
3. Set [Operating time].
   - Press ▲▼ once to change the time by 1 minute.  
     Keep pressing down to change the time by 15 minutes.
   - In [ENGLISH(US)] OSD language, [Operating time] is displayed as [SAVER DURATION].

**To set start and finish time of Screensaver**

1. Select [Time designation] in [Mode].
2. Set [Start time] and [Finish time].
   - Press ▲▼ once to change the time by 1 minute.  
     Keep pressing down to change the time by 15 minutes.
   - In [ENGLISH(US)] OSD language, [Time designation] is displayed as [TIME OF DAY].

**Note**

- Please set [Date and time] before setting [Start time] and [Finish time]. (see page 54)

**To turn the power off after Screensaver**

1. Select [Standby after SCR saver] in [Mode].
2. Set [Screensaver duration].
   - Press ▲▼ once to change the time by 1 minute.  
     Keep pressing down to change the time by 15 minutes.
   - Screensaver will be activated and the power will be turned off (Standby) at the time set.

**Note**

- [Screensaver duration] can be set from 0:00 to 23:59.
  - When this is set to [0:00], [Standby after SCR saver] will not be activated.
### Input label

This function can change the label of the Input signal to be displayed.

#### Input label - submenu screen

<table>
<thead>
<tr>
<th>Input label</th>
<th>HDMI1</th>
<th>HDMI2</th>
<th>DIGITAL LINK</th>
<th>DVI-D</th>
<th>PC</th>
<th>COMPONENT</th>
<th>VIDEO</th>
</tr>
</thead>
</table>

(Skip): When <INPUT> is pressed, the input will be skipped.

*: [COMPONENT] may be displayed as [RGB] depending on the settings of [Component/RGB-in select]. (see page 46)

### Power management settings

Set each item to reduce power consumption.

#### Power management settings - submenu screen

<table>
<thead>
<tr>
<th>Power management settings</th>
<th>[Power management mode]</th>
<th>[No signal power off]</th>
<th>[HDMI1 power management]</th>
<th>[HDMI2 power management]</th>
<th>[DIGITAL LINK power management]</th>
<th>[DVI-D power management]</th>
<th>[PC power management]</th>
<th>[Power save]</th>
</tr>
</thead>
<tbody>
<tr>
<td>Power management settings</td>
<td>Custom</td>
<td>Disable</td>
<td>off</td>
<td>off</td>
<td>off</td>
<td>off</td>
<td>off</td>
<td>off</td>
</tr>
</tbody>
</table>

■ [Power management mode]: [On]

The following fixed values are set to the menu of power consumption reduction. Individual setting is not available.

- [No signal power off]: [Enable]
- [HDMI1 power management]: [On]
- [HDMI2 power management]: [On]
- [DIGITAL LINK power management]: [On]
- [DVI-D power management]: [On]
- [PC power management]: [On]
- [Power save]: [On]

■ [Power management mode]: [Custom]

The menu of the power consumption reduction is individually set. This setting is enabled when [Power management mode] is set to [Custom].

- [No signal power off]

When this is set to [Enable], the power supply of the unit goes off automatically (standby) when there is no operation or sync signal for about 10 minutes.

Note
- With the USB input, the unit determines no signal is present when the USB memory is not connected to the USB terminal.

- [HDMI1 power management]
  - [HDMI2 power management]

When this function is set to [On], it operates under the following conditions to turn the power on or off automatically.

When no pictures (sync signal) are detected for 60 seconds or so at HDMI1 or HDMI2 input:

- Power is turned off (standby); the power indicator lights up orange.

When pictures (sync signal) are subsequently detected:

- Power is turned on; the power indicator lights up green.
[DIGITAL LINK power management]
When this function is set to [On], it operates under the following conditions to turn the power on or off automatically.

When no pictures (sync signal) are detected for 60 seconds or so at DIGITAL LINK input:
Power is turned off (standby); the power indicator lights up orange.

When pictures (sync signal) are subsequently detected:
Power is turned on; the power indicator lights up green.

[DVI-D power management]
When this function is set to [On], it operates under the following conditions to turn the power on or off automatically.

When no pictures (sync signal) are detected for 60 seconds or so at DVI-D input:
Power is turned off (standby); the power indicator lights up orange.

When pictures (sync signal) are subsequently detected:
Power is turned on; the power indicator lights up green.

[PC power management] (DPMS function)
When this function is set to [On], it operates under the following conditions to turn the power on or off automatically.

When no pictures (HD/VD sync signals) are detected for 60 seconds or so at PC input:
Power is turned off (standby); the power indicator lights up orange.

When pictures (HD/VD sync signals) are subsequently detected:
Power is turned on; the power indicator lights up green.

Note
- This function is effective when [Sync] in [Signal] is set to [Auto] or [HV sync] and [Component/RGB-in select] is set to [RGB]. (see page 46)

Note
- If [Input search] is set to items other than [Off], the [Input search] function is prioritised. (The “Power management” function does not operate for each terminal.) (For details of [Input search] function, see page 60.)
- If [Failover/Failback] - [Input change mode] is set to items other than [Off], the [Failover/Failback] function is prioritised. (The “Power management” function does not operate for each terminal.) (For details of [Failover/Failback] function, see page 61.)

[Power save]
This function adjusts the brightness of the backlight to reduce power consumption.

[Off]:
This function does not operate.

[On]:
Backlight brightness is reduced.

Note
- If this function is set to [On] when [Setup] - [LightID] is set to [External control] or [Internal ID], [Picture] - [Backlight] is fixed to [Low].

LightID
Changes the transmission setting for the LightID.

[External control]:
Sends the ID set from outside.
When the LightID is switched from this setting, or the unit is turned off, the ID being sent is cleared.

[Internal ID]:
When the LightID is switched to this setting, or the unit starts up, the internal ID (Internal LightID) is sent.
The ID set from outside can also be sent.

[Off]:
The function is disabled.

Use either of the following methods to set the ID from outside.
- Multi Monitoring & Control Software (see page 76)
- USB Media Player (see page 84)

Note
For purchasing LightID, see the following Panasonic web site.
http://panasonic.net/avc/LinkRay/
As default, a sample ID is included in the Internal LightID.
If [LightID] is set to [Internal ID] at the time of purchase, an ID to guide you to the Panasonic homepage is sent.

In the following cases, the reception performance of the LightID using devices, such as a smartphone may be degraded.
- When the LCD panel of this unit is exposed to an external intense light, etc.
- When the multi display setting is used with this unit, or another LightID transmission device is installed adjacent
- When receiving far away from this unit, or receiving at a location other than the front of this unit
- When receiving from a dark image scene or black parts outside the display range of the LCD panel

When sending the LightID, displayed images may flicker due to the brightness change of the LightID transmission. This is not a malfunction.
For handling devices receiving the LightID, such as a smartphone, see the following Panasonic web site.
http://panasonic.net/avc/LinkRay/

The LightID function of this unit does not guarantee all the operations of a smartphone and other devices.

Wobbling

Automatically shifts the display image (therefore unnoticeable to the eye) to prevent image retention of sharper contour of image.

Setting this to [On] moves the screen position at certain intervals and displays the images.

( Note )
- If [Multi display setting] is set to [On], this function does not operate. (see page 52)
- When this function is operating, part of the screen may appear to be missing.

No activity power off

When this function is set to [Enable], the power is turned off (standby) automatically when there is no operation of the Display for 4 hours.

Starting from 3 minutes before the turn off, the remaining time will be displayed.

Press any key to abort.
No activity power off 3 min

When the power is turned off due to this function, a message [Last turn off due to ‘No activity power off’.] is displayed next time the power is turned on.

( Note )
- While the screensaver is running, this function is disabled.

<tr>
<td>Vertical scale</td>
</tr>
<tr>
<td>Bezel H adjustment</td>
</tr>
<tr>
<td>Bezel V adjustment</td>
</tr>
<tr>
<td>Location</td>
</tr>
</tbody>
</table>

( Note )
- The settings are memorised separately for each input terminal.
- When the multi display is set to [Off], adjust to the same angle of view for [Position] (see page 37).
- Then, set the multi display to [On]. Again, make fine adjustment of the angle of view for [Position].
- The [Position] menu can be adjusted in the multi display status.

■ [Multi display setting]

[Off]:
- The display is not divided when enlarged.

[On]:
- The display is divided when enlarged.
- When [On] is set, the display aspect is [16:9].

■ [Horizontal scale]
Set the horizontal scale in the multi display.
1 to 10 (1 to 2 for USB input)

■ [Vertical scale]
Set the vertical scale in the multi display.
1 to 10 (1 to 2 for USB input)

Example:
[Horizontal scale] [5] and [Vertical scale] [5] is set in the multi display
**[Bezel H adjustment], [Bezel V adjustment]**
Adjust the area of image hidden in the joint horizontally and vertically respectively.

0 to 100

Display example

Setting value: 0

Displays the entire image including the joint area.
(Suitable when displaying character information on PC.)

Setting value: 100

Does not display the image of the joint area.
(Suitable when displaying motion pictures.)

**[Location]**
Assign the multi display position.

Example:

[Horizontal scale] [10], [Vertical scale] [10]

<p>| | | | | |</p>

Select from A1 to J10.

- The displayed content for setting changes according to the settings for the [Horizontal scale] and [Vertical scale].
- By setting [Multi display setting] to [Off], it is possible to check the location on the screen while the setting menu is displayed.

**Set up timer**
Sets the program to turn the power on with the specified time and video input, or to turn the power off at the specified time. Up to 20 programmes can be set.

**Note**
- Set [Date and time] before setting [Set up timer]. (see page 54)
- When multiple programs are set at the same time, the program with the smallest program number is enabled.

**[Set up timer] - submenu screen**

Setting Example
Program 1, Every Monday, 12:00,
Power On, Input: HDMI1

1 Set the program number.
2 To execute the program, set to [On].
   The program is disabled when [Off] is set.
3 Set the day.
   The program is executed every day when [Everyday] is set.
4 Set the power On/Off.
5 Set the time.
   Pressing once changes time 1 minute.
   Pressing continuously changes time by 15 minutes.
6 Set the input.
### Date and time

Set date and time. ([- -] shows no programme is set.)

**[Date and time] - submenu screen**

- **Set date and time**
  1. Select [Year / Month / Day / Hour / Minute].
  2. Set the selected item.

  ![Date and time](image)

- Select [Set] and press <ENTER>.

  ![Date and time](image)

  **Note**
  - If the present date and time are not set, the time settings for [Set up timer], [Screnrsaver], etc. cannot be made.
  - The present date and time setting is reset in the following case.

  When the main unit is left unattended for 7 days or longer after the <Main Power On / Off button> is turned OFF, the power plug is removed, or power failure has occurred, etc.

  - Date and time cannot be set when [Year / Month / Day / Hour / Minute] are set to [- -].

### Network settings

Set when networking with a computer.

**[Network settings] submenu will be displayed.**

- **[Serial control]**
  Selects the RS232-C control terminal.

  **[SERIAL IN]:**
  Controls using the SERIAL IN terminal of the display.

  **[DIGITAL LINK]:**
  Controls via the optional device that supports DIGITAL LINK output (ET-YFB100G, ET-YFB200G) and the DIGITAL LINK / LAN terminal.

- **[Network control]**
  Set when controlling with the unit’s LAN terminal.

  **[On]:**
  Controls via LAN using the LAN terminal of the Display. The power indicator lights orange when the power is turned off with the remote control (standby).

  **[Off]:**
  Invalidates control with LAN terminal. (In this case, the power consumption of Standby condition (when the power is turned off with the remote control) will be slightly reduced.)

  **Note**
  - When using the LAN control function for “Using Network Function” (see page 70 - 76), set this function to [On]. Even if [Off] is selected, the HDMI communication via a twisted pair cable transmitter is possible while the power is on.

- **[Display name]**
  The name of the Display that is shown on the network can be changed.
[LAN setup]

Detailed network settings for the LAN established via the LAN terminal of the Display can be configured.

Select [LAN setup] with ▲▼ and press <ENTER>.

<table>
<thead>
<tr>
<th>LAN setup</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Save</td>

<td>-:-:--:--:--:--</td>
</tr>
</tbody>
</table>

[DHCP], [IP address], [Subnet mask], [Gateway]

When [Off] is selected, IP address and other settings can be set manually.

[On]:
(DHCP client function)

- Obtains an IP address automatically when a DHCP server exists in the network the Display is going to be connected.

[Off]:
- When a DHCP server does not exist in the network the Display is going to be connected, set [IP address], [Subnet mask] and [Gateway] manually.

[IP address]:
(IP address display and setting)

- Enter an IP address when DHCP server is not used.

[Subnet mask]:
(Subnet mask display and setting)

- Enter a Subnet mask when DHCP server is not used.

[Gateway]:
(Gateway address display and setting)

- Enter a gateway address when DHCP server is not used.

( Note )
- When [DHCP] is set to [On], the IP address, etc. will be displayed in grey.

Entering numbers

| IP address | 192.168.000.008 |

1. Select the address and press <ENTER>.
2. Select digits with ▲▼.
3. Change numbers with ▲▼.
4. Press <ENTER>.
   You can cancel the change by pressing <RETURN>.

Select [Save] and press <ENTER>.

Save the current network Setup.

( Note )
- To use a DHCP server, make sure the DHCP server is started.
- Contact your network administrator for details on [IP address], [Subnet mask] and [Gateway].
- Shipping condition [DHCP]: Off
  [IP address]: 192.168.0.8
  [Subnet mask]: 255.255.255.0
  [Gateway]: 192.168.0.1

[Port]

Set the port number used for command control.

Select [Port] and press <ENTER> to set the number.

- The available setting range is 1024 - 65535.
- Entering numbers (see page 55)

( Note )
- When the PJLink protocol is used, the port setting is not necessary.

[MAC address]

Displays the MAC address of this unit.

[Network status]

Checks the current Network settings status.

<table>
<thead>
<tr>
<th>Network status</th>

</tr>
</tbody>
</table>
■ [DIGITAL LINK mode]
Switches communication method of DIGITAL LINK terminal.

[Auto]:
Communication method is selected automatically.

[DIGITAL LINK]:
Communication method is fixed to DIGITAL LINK.

[Ethernet]:
Communication method is fixed to Ethernet.

[Long reach]:
Communication method is fixed to Long reach.

Modes allowing communication
✓: Valid
—: Invalid

<table>
<thead>
<tr>

<td>—</td>
</tr>
</tbody>
</table>

**Note**

- When connected with the [Long reach] communication method, the maximum transmission distance is 150 m. In this case, this unit can receive the signals of up to 1080/60p (148.5 MHz).
- If the communication method of the twisted pair cable transmitter is set to [Long reach], set [DIGITAL LINK mode] to [Auto]. Then, connection is enabled with the [Long reach] communication method.
- When connecting with the separately sold DIGITAL LINK Switcher (ET-YFB200G) with the [Long reach] communication method, set [DIGITAL LINK mode] to [Long reach].
- Even if [DIGITAL LINK mode] is set to [Long reach], when the twisted pair cable transmitter does not support the communication method of [Long reach], it will not be connected properly.

■ DIGITAL LINK status
Display the DIGITAL LINK connection environment.
Select [DIGITAL LINK status] with ▲▼ and press <ENTER>.

<table>
<thead>
<tr>
<th>DIGITAL LINK status</th>
<th>LINK status</th>
<th>HDMI status</th>
<th>Signal quality</th>
</tr>
</thead>
<tbody>
<tr>

<td>Min</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Max</td>
</tr>
</tbody>
</table>

**[LINK status]:**
1 of the followings will be displayed.

[No link]:
No LAN connection, etc.

[DIGITAL LINK]:
Connected to the DIGITAL LINK device by LAN.

[Long reach]:
Communication method is set to [Long reach] and is connected to the DIGITAL LINK device by LAN.

[Ethernet]:
The PC is connected to the DIGITAL LINK / LAN terminal of this product and is LAN connected.

[HDMI status]:
1 of the followings will be displayed.

[No HDMI]:
DIGITAL LINK not connected

[HDMI on]:
DIGITAL LINK connected

[HDCP on]:
HDCP supported on DIGITAL LINK

**[Signal quality]:**
It is the quantified minimum and maximum numbers of errors that have occurred. The display colours are red, yellow, or green, depending on the number.

<table>
<thead>
<tr>
<th>Signal quality</th>
<th>Display Colours</th>
<th>Reception Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>-12dB or below</td>
<td>Green</td>
<td>Good</td>
</tr>
<tr>
<td>-11 to -8dB</td>
<td>Yellow</td>
<td>Bad</td>
</tr>
<tr>
<td>-7dB or above</td>
<td>Red</td>
<td>Terrible</td>
</tr>
</tbody>
</table>

- The number is represented by yellow or red if the LAN cable is disconnected or the cable is not shielded.
- This signal quality shows figures between the twisted pair cable transmitter that is connected and the display.
DIGITAL LINK menu
Displays the setting menu of Digital Interface Box.
Select [DIGITAL LINK menu] with ▲▼ and press <ENTER>.

Note
- This function can only be selected when the Panasonic device that supports DIGITAL LINK output (ET-YFB100G, ET-YFB200G) is connected to a DIGITAL LINK / LAN terminal and its power is on.
- For details, refer to the manuals of the devices that support DIGITAL LINK output.

[AMX D. D.]
Set whether to allow the Display to be detected by AMX Device Discovery.
[On]: Enables detection by AMX Device Discovery.
[Off]: Disables detection by AMX Device Discovery.
- For more details, visit the following web site.
  http://www.amx.com/

[Crestron Connected™]
When this function is set to [On], the Display can be monitored or controlled via the network using equipment and application software of Crestron Electronics, Inc. This Display supports the following application software from Crestron Electronics, Inc.
- RoomView® Express
- Fusion RV®
- RoomView® Server Edition
[Crestron Connected™] is a function to connect to a system developed by Crestron Electronics, Inc. which manages and controls multiple system devices connected to the network.
- For details of “Crestron Connected™”, refer to the Crestron Electronics, Inc. web site (Provided only in English).
  http://www.crestron.com/
- For the download of “RoomView® Express”, refer to the Crestron Electronics, Inc. web site (Provided only in English).
  http://www.crestron.com/getroomview

[Extron XTP]
Set to [On] when connecting XTP Transmitter made by Extron to USB terminal.
- For more details on Extron, visit the following web site.
  http://www.extron.com

[Reset]
You can reset the network setting to the factory default of the Display.
Select [Yes] with ▲▼ and press <ENTER>.

USB media player settings
Set for USB media player function.
[USB media player settings] - submenu screen

[USB media player]
Set to enable or disable the USB media player function.

[Resume play]
Set resume play off/on.

[Scenario file check]
Execute the contents check of the USB memory which is connected to the USB terminal. If any error is detected, the error code and file name will be displayed.
For details of the error codes, refer to “USB memory contents check”. (see page 88)
Select [Scenario file check] with ▲▼ and press <ENTER>.

[Slide show duration]
Select the displaying duration for still images.
[10 sec] to [600 sec]
Function button settings

Assigns specific functions to the numeric buttons (<1> to <6>). The buttons can be used as shortcut keys by assigning frequently used operations.

1 Switch [Function group] with ◀ ▶.

[Function button settings] - submenu screen

<table>
<thead>
<tr>
<th>Function button settings</th>
</tr>
</thead>
<tbody>
<tr>
<td>Function group</td>
</tr>
<tr>
<td>-----------------</td>
</tr>
<tr>
<td>Function button 1</td>
</tr>
<tr>
<td>Function button 2</td>
</tr>
<tr>
<td>Function button 3</td>
</tr>
<tr>
<td>Function button 4</td>
</tr>
<tr>
<td>Function button 5</td>
</tr>
<tr>
<td>Function button 6</td>
</tr>
<tr>
<td>Function button guide</td>
</tr>
</tbody>
</table>

2 Select the numeric button with ◀ ▶ and set the function to assign with ◀ ▶.

Functions assignable to the numeric buttons

[Input] (Direct input select)

Input can be selected with single-touch operation.

*: [COMPONENT] may be displayed as [RGB] depending on the settings of [Component/RGB-in select]. (see page 46)

[Memory load]

Memory can be loaded with single-touch operation.

Memory load (see page 44)

[MEMORY1] to [MEMORY6]

- [MEMORY1] to [MEMORY6] load functions are already assigned to <1> to <6> respectively. These settings cannot be changed.

[Shortcut]

[Signal], [Screensaver], [Set up timer], [Power management settings], [Network settings], [Multi display settings]

- Pressing the numeric button displays the menu screen. Pressing the button again exits the menu screen.

[AV mute]

- Pressing the numeric button mutes the audio and pictures.

To cancel, press any button on the remote control except the <Standby (ON/OFF) button>.

[Digital zoom]

- Switches to [Digital zoom] mode by pressing numeric buttons. (see page 34)

Shipping condition

The following functions are assigned to the numeric buttons as factory default.

<table>
<thead>
<tr>
<th>[Input]</th>
<th>[Memory load]</th>
<th>[Shortcut]</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 HDMI1</td>
<td>MEMORY1</td>
<td>[Signal]</td>
</tr>
<tr>
<td>2 HDMI2</td>
<td>MEMORY2</td>
<td>[Screensaver]</td>
</tr>
<tr>
<td>3 DIGITAL LINK</td>
<td>MEMORY3</td>
<td>[Set up timer]</td>
</tr>
<tr>
<td>4 DVI-D</td>
<td>MEMORY4</td>
<td>[Power management settings]</td>
</tr>
<tr>
<td>5 PC</td>
<td>MEMORY5</td>
<td>[Network settings]</td>
</tr>
<tr>
<td>6 USB</td>
<td>MEMORY6</td>
<td>[AV mute]</td>
</tr>
</tbody>
</table>

[Function button guide]

Sets the function display when numeric buttons are pressed. Set this for each function group.

[On]:

Displays the function list for the numeric buttons.

[Off]:

Does not display the function list. Operation starts when numeric buttons are pressed.

Note

To use shortcut (numeric buttons)

1 Press <FUNCTION> or <1> - <6>.

[Function button guide] will be displayed.

[Function button guide]: When [Off] is set, pressing the numeric button starts operation.

Example: Input

<table>
<thead>
<tr>
<th>Input</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. HDMI 1</td>
</tr>
<tr>
<td>2. HDMI 2</td>
</tr>
<tr>
<td>3. DIGITAL LINK</td>
</tr>
<tr>
<td>4. DVI-D</td>
</tr>
<tr>
<td>5. PC</td>
</tr>
<tr>
<td>6. USB</td>
</tr>
</tbody>
</table>

2 Press <FUNCTION> to switch function group.

Example: Memory load

<table>
<thead>
<tr>
<th>Memory load</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. MEMORY 1</td>
</tr>
<tr>
<td>2. MEMORY 2</td>
</tr>
<tr>
<td>3. MEMORY 3</td>
</tr>
<tr>
<td>4. MEMORY 4</td>
</tr>
<tr>
<td>5. MEMORY 5</td>
</tr>
<tr>
<td>6. MEMORY 6</td>
</tr>
</tbody>
</table>
3 Press <1> - <6>.
The function for the pressed button starts to operate.
Example: When <2> is pressed.

<table>
<thead>
<tr>
<th>Memory load</th>
</tr>
</thead>
<tbody>
<tr>
<td>Load from ‘MEMORY2’</td>
</tr>
<tr>
<td>Ok</td>
</tr>
</tbody>
</table>

**Display orientation**
Sets the on-screen display orientation in the portrait setting.

[Landscape]:
On-screen display angle is for horizontal installation.

[Portrait]:
The on-screen display rotates anticlockwise by 90 degrees for easy view in the portrait setting.

![Power indicator](image)

**Note**
- In the portrait setting, the power indicator shall come to the downside.

---

**OSD position**
Sets the display position of the on-screen menu.
Each time ◀ or ▶ is pressed, the display position of the on-screen menu changes.
Display example:

![Display examples](image)

**Note**
- Display position settings vary depending on the setting of [Display orientation].
  - [Display orientation]: When it is set to [Landscape]
    - [Left] / [Centre] / [Right]
  - [Display orientation]: When it is set to [Portrait]
    - [Upper] / [Centre] / [Lower]

**Menu display duration**
Sets the display duration time for the on-screen menu.
[5 sec] to [180 sec]

**Menu transparency**
Sets the transparency rate of the on-screen display background.
0 to 100
Options Adjustments

This unit offers special functions conveniently used according to the installation location and application.

1 Press <SETUP>.
[Setup] menu screen will be displayed.

2 Select [OSD language] with ▲▼ and press <ENTER> for more than 3 seconds.
Following screen will be displayed.

```
<table>
<thead>
<tr>
<th>Options</th>
<th>1/3</th>
</tr>
</thead>
<tbody>
<tr>
<td>Input search</td>
<td></td>
</tr>
<tr>
<td>Failover/Failback</td>
<td></td>
</tr>
<tr>
<td>Audio input select</td>
<td></td>

<tr>
<td>Onscreen display</td>
<td>Off</td>
</tr>
<tr>
<td>Initial input</td>
<td>Off</td>
</tr>
<tr>
<td>Initial VOL level</td>
<td>Off 0</td>
</tr>
<tr>
<td>Maximum VOL level</td>
<td>Off 0</td>
</tr>
<tr>
<td>Input lock</td>
<td>Off</td>
</tr>
<tr>
<td>Button lock</td>
<td>Off</td>
</tr>
<tr>
<td>Controller user level</td>
<td>Off</td>
</tr>
<tr>
<td>PC auto setting</td>
<td>Off</td>
</tr>
</tbody>
</table>
```

3 Select [Options] with ▲▼ and press <ENTER>.
[Options] menu screen will be displayed.

```
<table>
<thead>
<tr>
<th>Options</th>
<th>2/3</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off-timer function</td>
<td>Enable</td>
</tr>
<tr>
<td>Initial startup</td>
<td>Last memory</td>
</tr>
<tr>
<td>Startup logo</td>
<td>Off</td>
</tr>
<tr>
<td>Display ID</td>
<td>0</td>
</tr>
<tr>
<td>Controller ID function</td>
<td>Off</td>
</tr>
<tr>
<td>Serial ID function</td>
<td>Off</td>
</tr>
<tr>
<td>Serial response(ID all)</td>
<td>Off</td>
</tr>
<tr>
<td>Serial daisy chain position</td>
<td>---</td>
</tr>
<tr>
<td>LAN control protocol</td>
<td>Protocol 1</td>
</tr>
<tr>
<td>Information timing</td>
<td></td>
</tr>
</tbody>
</table>
```

4 Select the item to set with ▲▼.
   For [Input search], [Failover/Failback], [Audio input select] and [Information timing], the submenu screen will be displayed when you press <ENTER>.
   (see page 60, 61, 64, 67)

5 Set with ◀▶.

6 Press <SETUP> to exit from [Options] menu.

   ( Note )
   ● The remote control is necessary to display the [Options] menu. The control panel buttons on the main unit cannot be used to display the menu.
   ● Press <RETURN> to return to the previous menu.
   ● The serial number of this device is displayed when [Display serial number] is selected in step 3.
   ● The software License is displayed when [Software licenses] is selected in step 3.

### Input search

When a signal is not detected, another input with a signal is automatically selected.

Select the item with ▲▼.
Select the set point with ◀▶.

```
<table>
<thead>
<tr>
<th>Input search</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Input search</td>
<td></td>
</tr>
<tr>
<td>[Off]:</td>
<td></td>
</tr>
<tr>
<td>When there is no signal, the input is not switched automatically.</td>
<td></td>
</tr>
<tr>
<td>[All inputs]:</td>
<td></td>
</tr>
<tr>
<td>Searches all inputs and switches to an input with a signal.</td>
<td></td>
</tr>
<tr>
<td>Input search is executed in the following order.</td>
<td></td>
</tr>
<tr>
<td>(Example) When the current input is [HDMI1] [HDMI2] → [DIGITAL LINK] → · · · · · · → [USB] → [HDMI1]</td>
<td></td>
</tr>
</tbody>
</table>
```

**Note**
- The inputs set to [(Skip)] in [Input label] (see page 50) are skipped when searching.
- When Y/G/VIDEO terminal is used as VIDEO input, set [COMPONENT]* to [(Skip)].
- [COMPONENT] may be displayed as [RGB] depending on the settings of [Component/RGB-in select]. (see page 46)

---

Note
- [POWER button lock] function is only for TH-55SF1HU, TH-49SF1HU and TH-42SF1HU.

---

60 English
Repeatedly searches [Current input], [1st search input] and [2nd search input] in order, and switches to an input with a signal.

[1st search input], [2nd search input]
Set the input to search when [Custom] is selected.

*: [COMPONENT] may be displayed as [RGB] depending on the settings of [Component/RGB-in select]. (see page 46)

Note
- With the USB input, the unit determines no signal is present when the USB memory is not connected to the USB terminal.
- This menu will be greyed out and cannot be set under the following conditions.
  - [Input lock] is not set to [Off]. (see page 65)
  - [Failover/Failback] - [Input change mode] is not set to [Off]. (see page 61)
- If the input is changed by this function, the last input is selected when the power is turned on next time. If you wish to retain the original input when the power is turned on, set [Initial input] to the original input. (see page 64)

Failover/Failback
Automatically switches to the backup input video if an interruption of video occurs.

1. Select the item with ▲▼.
   Select the set point with ◀▶.

[Input change mode]

[Off]:
Disables the Backup Input function.

[Quick]:
Promptly switches to the backup input if an interruption of video occurs.

Note
- The backup video signal needs to be in the same format as the (main) input in use for viewing.
- Upon switching to the backup input, the video and audio adjustment values for the (main) input used for viewing will be inherited.

[Primary backup input]
Sets the first priority backup input.

(No) / [HDMI1] / [HDMI2] / [DIGITAL LINK] / [DVI-D]

The input that is of the same type as the one in use for viewing will be greyed out.

[Secondary backup input]
Sets the second priority backup input.

(No) / [HDMI1] / [HDMI2] / [DIGITAL LINK] / [DVI-D]

The input that is of the same type as the one in use for viewing will be greyed out.
**[Auto switch back mode]**
Sets whether or not to automatically return to the former (main) input when the former input video initially viewed is restored while viewing the video of the backup input enabled by the operation of the Backup Input function.

- **[Disable]:** Unreturned
- **[Enable]:** Returned

**[Changing mode]**
Select speed of input switching.

- **[High speed]:**
  - If switching between the same signal formats, it is possible to switch within 1 second.
  - If switching between the different signal formats, picture noise is caused.

- **[Normal speed]:**
  - If switching between the same signal formats, it is possible to switch within 2 seconds.
  - If switching between the different signal formats, it takes 3 to 4 seconds to switch but picture noise is not caused.

**[Backup input change]**
Displays whether or not operating conditions for the Backup Input function are met.

- **[Inactive]:** Indicates that the conditions are not met, and inactivates the Backup Input function.
- **[Active]:** Indicates that the conditions are met, and activates the Backup Input function.

**[Main input]**
Displays the (main) input initially used for viewing.

**[Current input]**
Displays whether the input currently in use for viewing is the (main) input initially used for viewing or the backup one.

---

### Setting conditions

<table>
<thead>
<tr>
<th>Backup</th>

<td>×</td>
</tr>
</tbody>
</table>

- ○: Selectable for both Primary and Secondary.
- ×: Not selectable for neither Primary nor Secondary.
- *: [COMPONENT] may be displayed as [RGB] depending on the settings of [Component/RGB-in select]. (see page 46)

### Recall display

Pressing <RECALL> displays any of the followings.

- When the main input is being used for viewing and the operating conditions for the Backup Input function are met.

<table>
<thead>
<tr>
<th>HDMI1</th>
<th>16:9</th>
</tr>
</thead>
<tbody>
<tr>
<td>Main input</td>
<td>Backup OK</td>
</tr>
</tbody>
</table>

- When the backup input, enabled by the operation of the Backup Input function, is being used for viewing.

<table>
<thead>
<tr>
<th>HDMI1</th>
<th>16:9</th>
</tr>
</thead>
<tbody>
<tr>
<td>Backup Input</td>
<td>DVI</td>
</tr>
</tbody>
</table>

When the conditions for the Backup Input function are met, the following screen is displayed.

| Main input | Backup OK |
[Input change mode]: [Normal]
Switches to the backup input if an interruption of video occurs.

( Note )
- When an analogue (PC, COMPONENT or VIDEO) input is being used for viewing, you cannot set an analogue (PC, COMPONENT or VIDEO) input as a backup input.
- Any analogue (PC, COMPONENT or VIDEO) input cannot be set as [Primary backup input] or [Secondary backup input].
- This function will start operating once a video signal is detected by both the input in use for viewing and the backup input and the [Backup input change] item is displayed as [Active].

[Primary backup input]
Sets the first priority backup input.
The input that is of the same type as the one in use for viewing will be greyed out.
When an analogue (PC, COMPONENT or VIDEO) input is being used for viewing, you cannot set an analogue (PC, COMPONENT or VIDEO) input as a backup input.
Any analogue (PC, COMPONENT or VIDEO) input cannot be set as [Primary backup input] or [Secondary backup input].

[Secondary backup input]
Sets the second priority backup input.
The input that is of the same type as the one in use for viewing will be greyed out.
When an analogue (PC, COMPONENT or VIDEO) input is being used for viewing, you cannot set an analogue (PC, COMPONENT or VIDEO) input as a backup input.
Any analogue (PC, COMPONENT or VIDEO) input cannot be set as [Primary backup input] or [Secondary backup input].

[Auto switch back mode]
Sets whether or not to automatically return to the former (main) input when the former input video initially viewed is restored while viewing the video of the backup input enabled by the operation of the Backup Input function.

[Disable]:
Unreturned

[Enable]:
Returned

[Backup input change]
Displays whether or not operating conditions for the Backup Input function are met.

[Inactive]:
Indicates that the conditions are not met, and inactivates the Backup Input function.

[Active]:
Indicates that the conditions are met, and activates the Backup Input function.

[Main input]
Displays the (main) input initially used for viewing.

[Current input]
Displays whether the input currently in use for viewing is the (main) input initially used for viewing or the backup one.
*: [COMPONENT] may be displayed as [RGB] depending on the settings of [Component/RGB-in select]. (see page 46)

Setting conditions
The following table describes restrictions (available combinations) on each setting item.

○: Selectable for both Primary and Secondary.
△: Selectable for either Primary or Secondary.
×: Not selectable for neither Primary nor Secondary.
*: [COMPONENT] may be displayed as [RGB] depending on the settings of [Component/RGB-in select]. (see page 46)
Recall display
Pressing <RECALL> displays any of the followings.

- When the main input is being used for viewing and the operating conditions for the Backup Input function are met.

![HDMI1 16:9 Backup mode OK]

- When the backup input, enabled by the operation of the Backup Input function, is being used for viewing.

![HDMI1 16:9 Primary backup input]

When the conditions for the Backup Input function are met, the following screen is displayed.

![Backup mode OK]

Note
- When [Input search] is not set to [Off], this menu will be greyed out and cannot be set. (see page 60)
- With the USB input, the unit determines video signals are interrupted by judging the USB memory is not connected to the USB terminal.

Audio input select
Set up the sound when a video input is selected.

1 Select the video input with ▲▼.

Set the audio input with ◀▶.

<table>
<thead>
<tr>
<th>Audio input select</th>
</tr>
</thead>
<tbody>
<tr>
<td>HDMI1 ▶ HDMI1 ◀</td>

</table>

No audio: No audio input (Mute)
*: [COMPONENT] may be displayed as [RGB] depending on the settings of [Component/RGB-in select]. (see page 46)

When the setting for the audio input has been changed from the factory settings, the audio input is displayed as below.

![HDMI1 16:9 AUDIO1 IN]

Onscreen display
Set to display / hide the following Onscreen display.

- Power on display
- Input signal switch display
- No signal display
- No external media display (at USB input)
- MUTE display after displaying the menu screen
- Off timer remaining time display when 3 minutes remaining

[On]:
Displays the Onscreen display.

[Off]:
Hides the Onscreen display.

Initial input
Adjusts the input signal when the unit is turned on.

*: [COMPONENT] may be displayed as [RGB] depending on the settings of [Component/RGB-in select]. (see page 46)

Note
- This menu is available only when [Input lock] is [Off]. (see page 65)

Initial VOL level
Adjusts the sound volume level when the unit is turned on.

[Off]:
It will be the sound volume level which had been set before the power of the unit was turned off.

[On]:
Sets your preferred volume.

- Outputs with the set volume when [Initial VOL level] in [On] state is selected on the menu.
■ To adjust sound volume level
Press <VOL +> <VOL ->.

**Note**
- When [Maximum VOL level] is [On], the volume cannot be set to the level higher than the level set for [Maximum VOL level].

### Maximum VOL level
Adjusts the maximum volume.

**[Off]:**
The sound volume level can be set up to 100 (maximum).

**[On]:**
The sound volume level will not exceed the set point.

- Outputs with the set volume when [Maximum VOL level] is [On] state is selected on the menu.

■ To adjust sound volume level
Press <VOL +> <VOL ->.

**Note**
- When the [Maximum VOL level] is switched from [Off] to [On], if the [Maximum VOL level] is set lower than the [Initial VOL level], the [Initial VOL level] automatically becomes the same as the [Maximum VOL level].

### Input lock
Locks the input switch operation.

*: [COMPONENT] may be displayed as [RGB] depending on the settings of [Component/RGB-in select]. (see page 46)

**Note**
- Input switch can be used when this is set to [Off].

### Button lock
Limits operation of the buttons on the unit.

**[Off]:**
All the buttons on main unit can be used.

**[On]:**
All button operations except for the <Main Power On / Off button> are disabled.

**[MENU & ENTER]:**
Locks <MENU (Unit)> and <ENTER (Unit)> buttons.

---

■ To set [Button lock]
Set with the buttons on the unit.

**[Off]:**
1. Press <+ (Unit)> for 4 times.
2. Press <INPUT (Unit)> for 4 times.
3. Press <- (Unit)> for 4 times.
4. Press <ENTER (Unit)>.

**[On]:**
1. Press <- (Unit)> for 4 times.
2. Press <ENTER (Unit)> for 4 times.
3. Press <+ (Unit)> for 4 times.
4. Press <ENTER (Unit)>.

**[MENU & ENTER]:**
1. Press <ENTER (Unit)> for 4 times.
2. Press <+ (Unit)> for 4 times.
3. Press <INPUT (Unit)> for 4 times.
4. Press <ENTER (Unit)>.

**Note**
- About how to reset the settings to defaults: “Initialization” (see page 69)

### Controller user level
Limits operation of the buttons on the remote control.

**[Off]:**
You can use all of the buttons on the remote control.

**[User1]:**
You can only use <Standby (ON/OFF) button>, <INPUT>, <RECALL>, <MUTE>, <VOL +> and <VOL -> buttons on the remote control.

**[User2]:**
You can only use <Standby (ON/OFF) button> on the remote control.

**[User3]:**
Locks all the buttons on the remote control.

**Note**
- About how to reset the settings to defaults: “Initialization” (see page 69)
**PC auto setting**
Sets the operational mode of the automatic position adjustment in the [Position] menu.

| [Off]: | Automatic position adjustment starts when <AUTO SETUP> is pressed on the remote control or automatic position adjustment is executed from the [Position] menu. |
| [On]: | Other than remote control or menu operation, automatic position adjustment starts:  
  • When the display power is turned ON.  
  • When the input signal is switched. |

**Off-timer function**
Enables / disables Off timer function.

| [Enable]: | Enables the [Off-timer function]. |
| [Disable]: | Disables the [Off-timer function]. |

**Note**
* When [Disable] is set, the Off-timer is cancelled.

**Initial startup**
Sets the power mode of the unit for when the power recovers from failure or after plugging off and in again.

| [Last memory]: | Power returns in as the same state as before the power interruption. |
| [On]: | Power returns in power On.  
  (Power Indicator: green) |
| [Standby]: | Power returns in standby mode.  
  (Power Indicator: red/orange) |

**Note**
* When using multiple displays, [Standby] is preferred to be set in order to reduce a power load.

**Startup logo**
Sets to display / not to display the Panasonic logo on the screen when the display is turned on.

| [Off]: | Panasonic logo is not displayed. |
| [On]: | Panasonic logo is displayed. |

**Display ID**
Sets ID number when controlling the Display with [Controller ID function] and [Serial ID function].

0 - 100 (Standard value: 0)

**Controller ID function**
Enables/Disables the ID remote control function.
To operate this function, please purchase ID remote controller sold separately. (see page 90)

| [Off]: | Disables the ID remote control function. (Can be operated as normal remote control.) |
| [On]: | Enables the ID remote control function.  
  Effective on switching to [On]. |

**Note**
* To use the ID remote control function, setting ID numbers both for the remote control and for the display unit is required.  
  For ID number setting for the remote control and display unit, see page 90 and [Display ID] respectively.

**Serial ID function**
Set to control external control with the PC connected to SERIAL terminal according to the Display's ID number (Panel ID).

| [Off]: | Disables external control by the ID. |
| [On]: | Enables the external control by the ID. |

**Serial response(ID all)**
Sets whether to respond to the command or not, when serial command of ID No "0" is received.

| [Off]: | Does not respond. |
| [On]: | Responds. |
Serial daisy chain position

Set the first and last terminals in the chain when the SERIAL IN/OUT terminal of this unit is connected using a daisy chain scheme.

[---]:
When controlling this unit alone with serial control, or connecting at a position other than the first and last terminals in a daisy chain

[Top]:
When connecting at the first terminal in a daisy chain

[End]:
When connecting at the last terminal in a daisy chain

LAN control protocol

Select the LAN control protocol.

[Protocol 1]:
Control with the Panasonic Display sequence.

[Protocol 2]:
Control with the sequence that is compatible with Panasonic Projector.

Note
• For PJLink and WEB browser control, the operation is possible regardless of the setting.
• When performing the command control with TCP/IP, select [Protocol 1].
• When operating the “Early Warning Software” or “Multi Monitoring & Control Software”, select [Protocol 2].

Information timing

Set up the informing manner for no signal or temperature rising.

During RS-232C controls:
Warning or error message sent from the display automatically.

During LAN controls:
Acquire the warning or error message from the display.

1 Select the item with ▲▼.
2 Select the set point with ◀▶.

<table>
<thead>
<tr>
<th>Information timing</th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>No signal warning</td>
<td>On</td>
<td></td>
</tr>
<tr>
<td>No signal warning timing</td>
<td>5min</td>
<td></td>
</tr>
<tr>
<td>No signal error</td>
<td>On</td>
<td></td>
</tr>
<tr>
<td>No signal error timing</td>
<td>10min</td>
<td></td>
</tr>
<tr>
<td>Temperature warning</td>
<td>On</td>
<td></td>
</tr>
</tbody>
</table>

[No signal warning]
When set to [On], the display sends out the no signal warning.

[No signal warning timing]
Set up the detecting time for no signal warning.
(Range: 01 - 60, Interval: 1 minute)

[No signal error]
When set to [On], the display sends out the no signal error.

[No signal error timing]
Set up the detecting time for no signal error.
(Range: 01 - 90, Interval: 1 minute)

• The warning of [No signal warning] and the error of [No signal error] are not sent when the no signal state is detected through any of the following functions:
  [No signal power off], [HDMI1 power management], [HDMI2 power management], [DIGITAL LINK power management], [DVI-D power management], [PC power management] (see page 50)

Setting Example:
[No signal warning timing]: 5 minutes
[No signal error timing]: 10 minutes

Note
• The [No signal error timing] cannot be set shorter than [No signal warning timing].

[Temperature warning]
When set to [On], the display sends out the warning message.

Note
• With the USB input, the unit determines no signal is present when the USB memory is not connected to the USB terminal.
Power on screen delay

You can set the power-on delay time of the displays to reduce the power load, when you press <Main Power On / Off button> to turn on the multiple displays that are set together.

Set each display’s setting individually.

[Off]:
The display will be turned on at the same time as <Main Power On / Off button> is pressed.

[Auto]:
Sets the delay time automatically according to the number set for [Display ID]. The delay time is determined by multiplying [Display ID] × 0.3 seconds.
Example:
When [Display ID] is 3 → 0.9 seconds

1 to 30:
Set the power-on delay time (second).
After pressing <Main Power On / Off button>, the display will be powered on with time delay depending on this setting.

Note
● While this function is working, the power indicator is blinking green.
● This function also works when the power recovers from failure or after plugging off and in again the power cord.

Clock display

Sets to display / hide the clock.

[Off]:
Hides the clock.

[On]:
Displays the clock.

Note
● The clock is displayed at the lower left of the screen when <RECALL> button is pressed.
● When [Date and time] is not set, the clock is not displayed even when [Clock display] is [On]. (see page 54)

Power on message (No activity power off)

Sets to show/hide [No activity power off] precautions when the power is turned on.

[On]:
The warning precautions are shown when the power is turned on.

[Off]:
The warning precautions are not shown when the power is turned on.

Note
● This setting is enabled only when [No activity power off] is [Enable] (see page 52).

Power on message (Power management)

Sets to show/hide an information message that tells the power has been turned off by “Power management” function when the power is turned on.

[On]:
The information is shown when the power is turned on.

[Off]:
The information is not shown when the power is turned on.

Note
● This setting is enabled only when “Power management” function is [On] (see page 50).

POWER button lock

Sets the lock setting for the display <Main Power On / Off button>.

[On]:
<Main Power On / Off button> operation is disabled.

[Off]:
<Main Power On / Off button> operation is enabled.

Note
● This function is only for TH-55SF1HU, TH-49SF1HU and TH-42SF1HU.
Initialization

When both main unit buttons and remote control buttons are disabled due to the [Button lock], [Controller user level] and [Controller ID function] settings, set all the values [Off] so that all the buttons are enabled again.

Press <- (Unit)> together with <RETURN> and hold for more than 5 seconds.

[Shipping] is displayed and the lock is released when it disappears.

- Settings for [Button lock], [Controller user level] and [Controller ID function] will be back to [Off].
Using Network Function

This unit has a network function and you can control the Display connected to the network using your computer.

Necessary environment for computers to be connected

First of all, confirm your computer whether it has a wired LAN.

Before connecting the Display to the computer, be sure to check the following settings.

Check 1: About LAN cable

- Connect the cable properly.
- To connect a device using 100BASE-TX, use LAN cable that is compatible with category 5 or above.

Check 2: LAN settings

Computer with a built-in LAN function

- Switch on the wired LAN.

Computer without a built-in LAN function

- Check that your wired LAN adapter is recognized properly and it is switched on.
- Install the wired LAN adapter driver beforehand.
  For details on how to install the driver, refer to the instructions accompanying the wired LAN adapter.

About Web Browser

Web Browser is necessary to use WEB control.

- Compatible OS:
  Windows, Mac OS
- Compatible Web Browser:
  Internet Explorer 7.0 / 8.0 / 9.0 / 10.0 / 11.0 (Windows)
  Safari 4.x / 5.x / 6.x (Mac OS)

Example of network connection

Note

- To use the network function, set each item in [Network settings] and make sure to set [Network control] to [On].
  (see page 54)
  When it is set to [On], power indicator lights orange under the condition of power “Off” with remote control (stand-by state).

LAN Terminal connection

1 Display (Back of the unit)
2 PC
3 LAN Terminal
4 DIGITAL LINK/LAN Terminal
5 LAN Terminal
6 LAN cable (commercially available)
7 Hub or broadband router

Note

- For LAN cable, use shielded cable, otherwise picture noise may be caused.
- Make sure the broadband router or hub supports 10BASE-T/100BASE-TX.
- Touching the LAN Terminal with a statically charged hand (body) may cause damage to the device due to its discharge.
  Do not touch the LAN Terminal or the metal part of the LAN cable.
- For instructions on connection, consult your network administrator.
■ DIGITAL LINK Terminal connection

A twisted pair cable transmitter, such as the Panasonic device that supports DIGITAL LINK output (ET-YFB100G, ET-YFB200G) uses twisted pair cables to transmit inputted video and audio signals, and these digital signals can be input to the Display via the DIGITAL LINK terminal.

![Diagram of DIGITAL LINK Terminal connection]

1 Display (Back of the unit)  
2 PC  
3 LAN Terminal  
4 LAN cable (commercially available)  
5 Example: Panasonic ET-YFB100G  
6 Hub or broadband router

**Note**
- When using a DIGITAL LINK connection, set each item in [Network settings]. (see page 54)

---

**Precautions for use while connecting with a twisted pair cable transmitter**

**About installation / connection**

- Ask the dealer or a qualified technician to carry out the cable wiring work for DIGITAL LINK connections. Insufficient wiring work may cause the inability to apply the cable transmission characteristics and cropped or fuzzy images and sounds.
- The transmission distance between the twisted pair cable transmitter and the device is normally up to 100 meters. When the transmitter supports [Long reach] communication method, the transmittable distance is up to 150 m. Please note that if exceeding the limit, video or audio may be interrupted, or malfunction may be caused during LAN communication. Furthermore, when connecting using [Long reach] communication method, depending on the specification of the transmitters, transmittable video signals or the distance may be limited.
- Do not use a hub between the twisted pair cable transmitter and the device.
- If possible, lay the cable extended and not coiled in order to minimize both external and internal noise.
- Lay out cables of the twist pair cable transmitter and this product away from other cables, especially from the power supply cable.
- When laying multiple cables, keep them together as close as possible running parallelly and not bundled.
- After laying the cable(s), check that the signal quality in [DIGITAL LINK status] is -12 dB or below.

**About Twisted pair cables**

- Between the twisted pair cable transmitter and the device, use a LAN cable that conforms to the following conditions.
  - It meets or exceeds CAT5e standards
  - It is a straight cable
  - It is a shielded cable (with a connector)
  - It is a solid cable
- When laying the cable(s), use an instrument such as a cable tester or cable analyser and check whether the cable characteristics are CAT5e or above. When using a relay connector along the path, also include this in the measurements.
- Do not pull cables hard. Also, avoid bending or folding them forcefully.

**Other**

- This device is compatible with Panasonic devices that support DIGITAL LINK output (ET-YFB100G, ET-YFB200G). For the twisted pair cable transmitter of other manufacturers, see the web site: http://panasonic.net/prodisplays/support/digitallink.html
- Panasonic has tested other manufacturers’ devices according to our check items. This will not guarantee all the operations. For operation and performance defects caused by other manufacturers’ devices, contact each manufacturer.
**Command control**

Network function of the unit can control the unit in the same way as serial control from a network.

**Supported commands**

Commands used in the serial control are supported. (see page 23)

---

**Control Command via LAN**

The communication differs whether [Options] - [LAN control protocol] is set to [Protocol 1] or [Protocol 2].

1. **When [LAN control protocol] is set to [Protocol 1].**

Communicates using the display-specific protocol.

- **When the command control administrator privileges password has been set (Protect mode)**

**Connection method**

1. Obtain the display's IP address and the port number (Default is 1024), and request connection to the display.

   The IP address and the port number can be obtained from the following menus.
   - IP address: [Setup] → [Network settings] → [LAN setup] or [Network status]
   - Port number: [Setup] → [Network settings] → [LAN setup]

   * For more detail of the settings, see page 55, 55.

2. The display responds.

**Response data**

**Data part**

- **Space**
- **Mode**
- **Random number part**
- **Last terminal symbol**

- **Data part**: [PDPCONTROL] (ASCII code hex number)

<table>
<thead>
<tr>
<th>Space</th>
<th>Mode</th>

**Connection method**

1 Obtain the display’s IP address and the port number (Default is 1024), and request connection to the display.
   The IP address and the port number can be obtained from the following menus.
   - IP address:
     - [Setup] → [Network settings] → [LAN setup] or [Network status]
   - Port number:
     - [Setup] → [Network settings] → [LAN setup]
   For more detail of the settings, see page 55 - 55.

2 The display responds.

**Response data**

<table>
<thead>
<tr>
<th>Data part</th>
<th>Space</th>
<th>Mode</th>
<th>Last terminal symbol</th>
</tr>
</thead>
<tbody>
<tr>
<td>[NTCONTROL] (ASCII character string)</td>
<td>[] 0x20</td>
<td>[0] 0x30</td>
<td>(CR) 0x0d</td>
</tr>
<tr>
<td>9 bytes</td>
<td>1 byte</td>
<td>1 byte</td>
<td>1 byte</td>
</tr>
</tbody>
</table>

Mode: 0 = Non-protect mode
### Command transmission method
Transmit in the following command format

#### Transmitted data

<table>
<thead>
<tr>
<th>Header</th>
<th>Data part</th>
<th>Last terminal symbol</th>
</tr>
</thead>
<tbody>
<tr>
<td>'0' 0x30</td>
<td>'0' 0x30</td>
<td>(CR) 0x0d</td>
</tr>
<tr>
<td>1 byte</td>
<td>1 byte</td>
<td>Undefined 1 byte</td>
</tr>
</tbody>
</table>

#### Received data

<table>
<thead>
<tr>
<th>Header</th>
<th>Data part</th>
<th>Last terminal symbol</th>
</tr>
</thead>
<tbody>
<tr>
<td>'0' 0x30</td>
<td>'0' 0x30</td>
<td>(CR) 0x0d</td>
</tr>
<tr>
<td>1 byte</td>
<td>1 byte</td>
<td>Undefined 1 byte</td>
</tr>
</tbody>
</table>

#### Error response

<table>
<thead>
<tr>
<th>Error message</th>
<th>Last terminal symbol</th>

<tr>
<td>4 bytes</td>
<td>1 byte</td>
</tr>
</tbody>
</table>

### PJLink protocol

The unit’s Network function is compatible with PJLink Class 1. The following operations can be performed from a computer when PJLink protocol is used.
- Setting the Display
- Querying the Display status

#### Supported commands
The commands to control the unit with PJLink protocol are as follows.

<table>
<thead>
<tr>
<th>Command</th>
<th>Control</th>
</tr>
</thead>
<tbody>
<tr>
<td>POWR</td>
<td>Power control</td>
</tr>
<tr>
<td></td>
<td>0: Standby</td>
</tr>
<tr>
<td></td>
<td>1: Power On</td>
</tr>
<tr>
<td>POWR?</td>
<td>Power status query</td>
</tr>
<tr>
<td></td>
<td>0: Standby</td>
</tr>
<tr>
<td></td>
<td>1: Power On</td>
</tr>
<tr>
<td>INPT</td>
<td>Input switch</td>
</tr>
<tr>
<td></td>
<td>11: PC IN input (PC)</td>
</tr>
<tr>
<td></td>
<td>21: COMPONENT/RGY IN input (COMPONENT)</td>
</tr>
<tr>
<td></td>
<td>22: VIDEO input (VIDEO)</td>
</tr>
<tr>
<td></td>
<td>31: HDMI 1 input (HDMI1)</td>
</tr>
<tr>
<td></td>
<td>32: HDMI 2 input (HDMI2)</td>
</tr>
<tr>
<td></td>
<td>33: DIGITAL LINK input (DIGITAL LINK)</td>
</tr>
<tr>
<td></td>
<td>34: DVI-D IN input (DVI-D)</td>
</tr>
<tr>
<td></td>
<td>41: USB input (USB)</td>
</tr>
<tr>
<td>INPT?</td>
<td>Input switch query</td>
</tr>
<tr>
<td></td>
<td>11: PC IN input (PC)</td>
</tr>
<tr>
<td></td>
<td>21: COMPONENT/RGY IN input (COMPONENT)</td>
</tr>
<tr>
<td></td>
<td>22: VIDEO input (VIDEO)</td>
</tr>
<tr>
<td></td>
<td>31: HDMI 1 input (HDMI1)</td>
</tr>
<tr>
<td></td>
<td>32: HDMI 2 input (HDMI2)</td>
</tr>
<tr>
<td></td>
<td>33: DIGITAL LINK input (DIGITAL LINK)</td>
</tr>
<tr>
<td></td>
<td>34: DVI-D IN input (DVI-D)</td>
</tr>
<tr>
<td></td>

|         | 34: DVI-D IN input (DVI-D)  
|         | 41: USB input (USB) |
| NAME?   | Display name query  
|         | The name selected in [Display name] is returned. |
| INF1?   | Manufacturer name query  
|         | Returns “Panasonic”. |
| INF2?   | Model name query  
|         | Returns “55SF1HU” / “55SF1HW”.  
|         | (Example: 55-inch SF1HU / SF1HW model) |
| INFO?   | Other information query  
|         | Returns version number. |
| CLSS?   | Class information query  
|         | Returns “1”. |

**PJLink security authentication**

The password used for PJLink is the same as the password set for the command control. (see page 78)

When using PJLink without security authorization, set use without the password for administrator privileges and the password for user privileges of Web browser control.

- Concerning the specification of PJLink, see the web site of Japan Business Machine and Information System Industries Association (JBMIA) below:
  http://pjlink.jbmia.or.jp/english/index.html

**Early Warning Software**

This unit supports “Early Warning Software” which monitors the statuses of devices (projectors or displays) connected to an intranet, reports failures of devices and gives advance warning by detecting a predicted abnormality.

The maximum number of devices that can be registered to monitor differs according to the type of license. Up to 2048 devices can be registered and used for free for a maximum of 90 days after the installation to PC has completed.

- For more details, visit the following web site.
  http://panasonic.net/prodisplays/products/et-swa100/index.html

**Multi Monitoring & Control Software**

This unit supports “Multi Monitoring & Control Software” which monitors and controls devices (projectors or flat-panel displays) connected to an intranet.

For details, see the following website.
http://panasonic.net/prodisplays/download/software/index.html
Connecting with LAN

Note
- To use the network function, set each item in [Network settings] and be sure to set [Network control] to [On]. (see page 54)

Computer operation

1 Turn on the computer.
2 Make the network setting according to your system administrator.

When the Display settings are the default settings (see page 55), the computer can be used with the following network settings.

<table>
<thead>
<tr>
<th>IP address</th>
<th>192.168.0.9</th>
</tr>
</thead>
<tbody>
<tr>
<td>Subnet mask</td>
<td>255.255.255.0</td>
</tr>
<tr>
<td>Gateway</td>
<td>192.168.0.1</td>
</tr>
</tbody>
</table>

Using Web Browser Control

You can use a Web browser to control the unit and set up a network and password.

Before Using Web Browser Control

To use the Web browser control, the unit and computer set ups are required.

- About Web Browser
  Set each item in [Network settings] and be sure to set [Network control] to [On]. (see page 54)

- Computer Setup
  Disable the proxy server settings and enable JavaScript.
  - The setting procedure differs depending on the software version.
    Please refer to description in HELP, etc. of the software.

(Windows)

Windows 7 is used as an example.

Disable proxy server settings
1 Display [Internet Properties] window.
   Click [Start] - [Control Panel] - [Network and Internet] - [Internet Options].
   - If the on screen display looks different, please set [View by:] to [Category].
2 Click the [Connections] tab and then [LAN Settings].
3 Deselect the [Use automatic configuration script] and [Use a proxy server for your LAN] boxes.
4 Click [OK].

Enable JavaScript
1 Display [Internet Properties] window.
   Click [Start] - [Control Panel] - [Network and Internet] - [Internet Options].
   - If the on screen display looks different, please set [View by:] to [Category].
2 Set the security level on the [Security] tab to [Default Level]. Alternatively enable [Active scripting] from the [Custom Level] button.

(Macintosh)

Disable proxy server settings
1 From the [Safari] menu, click [Preferences].
   General screen is displayed.
2 From the [Advanced] tab, click the [Change Settings...] button next to [Proxies].
   Click [Proxies] and set up a proxy server.
3 Deselect the [Web Proxy] and [Automatic Proxy Configuration] boxes.
4 Click [Apply Now].
Enable JavaScript
1 Display [Security] of Safari.
2 Select [Enable JavaScript] under [Web content].

Access from Web Browser
Access to the TOP screen of the Web browser control using a Web browser.

1 Start your Web browser.
2 Enter the IP address set with the [LAN setup] of the unit.
   (see page 55)
3 Enter the user name and password when the Authentication screen is displayed.

4 Click [OK].
After logged in, the TOP screen of the Web Browser Control is displayed.

Note
- The password used here is the same password used for command control and the PJLink security authentication.
- Default user name and password are as follows:
  User name: user1 (user rights), admin1 (administrator rights)
  Password: panasonic
- Change password first.
- The password can be changed on the Password Setup screen after logging in (see page 80). Log in with administrator privileges to change this.
- When using “Crestron Connected™” (see page 82), log in with the administrator rights.
- Under no circumstances, Panasonic Corporation or its associated companies will ask customers their password directly.
  Even if you are asked directly, please do not reveal your password.

Operating with Web Browser

■ Description of each section

1 Page tab
   Click these to switch pages.
2 [Status]
   Click this item, and the status of the Display is displayed.
3 [Display control]
   Click this item to display the Display control page.
4 [Detailed set up]
   Click this item to display the advanced settings page.
5 [Change password]
6 [Crestron Connected™]
   Click this item to display the Crestron Connected™ operation page.
7 [Browser Remote Control]
   Click this item to display the Browser Remote Control on the WEB browser, which is the same as the supplied remote control.

Display status page
Click [Status], then [Display status] to display the Status information page.
This page displays the Display statuses established for the items shown below.

1 Displays the type of Display.
2 Displays the firmware version of the Display main unit.
Network status page
Click [Status], then [Network Status] to display the Status information page.
Displays the current configuration information of the network.

1 Displays the configuration details of wired LAN.

Basic control page
To move from another page, click [Display control], then [Basic control].

1 Power On/Off control
2 Use these to select the input signals
3 AUDIO mute
4 Switches aspect mode

Detail control page
Click [Display control], then [Advanced control] to display the Detail control page.

1 Enter a command. Use the same command used for the serial control.
2 Response from the unit is displayed.
3 Command is sent and run.

Note
- After the settings are changed, it may take a while till the display status is displayed.

Change Password page
Click [Change password].

1 Administrator
2 User

Administrator mode

1 Account
2 Current user name input field
3 Current password input field
4 New user name input field
5 New password input field
6 New password input field (re-enter for confirmation)
7 Button for executing password change

User account

1 Account
2 New user name input field
3 New password input field
4 New password input field (re-enter for confirmation)
5 Button for executing password change
User mode
A user can change password only.

1. Current password input field
2. New password input field
3. New password input field (re-enter for confirmation)
4. Button for executing password change

Note
● Up to 16 alphanumeric characters can be used for a password.
● When changing the administrator account, both “Current user name” and “Current password” are required.

Network config page
When connecting by logging in with administer privileges, you can make detailed settings for network related to display.

LAN settings

1. Click [Detailed set up] in the menu.

2. Click [Next].
   The settings window appears, showing the current settings.
   ・ To change the LAN settings, click [Change].
   ・ To return to the previous window, click [Back].

3. Complete the detailed settings and click [Next].
   Setting contents here are the same as the address information contents set for the [LAN setup] menu of the Display.
   After all required items have been entered, click [Next]. Then, a confirmation window appears.

4. Click [Submit].
   The settings will be registered.

Adjust clock page
Click [Detailed set up], then [Adjust clock] to display the Adjust clock page.

Note
● Changing the setting of LAN while connected with LAN might disconnect the connection.

1. New date field
2. New time field
3. Button to update time and date settings

Note
● Date and time is displayed as [- -] when they are not set.
● When [Network control] is set to [On] and it is in standby mode, date and time display will be blank and they cannot be set.
● If the time becomes incorrect immediately after setting the correct time, contact the dealer where you bought the Display.
Ping test page
This page makes it possible to check whether the network is connected to the DNS server, etc.
Click [Detailed set up], then [Ping test] to display the Ping test page.

① Enter the IP address of the server to be tested.
② Button for conducting the test

Display which appears when the connection was successful.

```
PING 192.168.0.10 (192.168.0.10): 56 data bytes
64 bytes from 192.168.0.10: seq=0 ttl=128 time=0.271 ms
64 bytes from 192.168.0.10: seq=1 ttl=128 time=0.273 ms
64 bytes from 192.168.0.10: seq=2 ttl=128 time=0.217 ms
64 bytes from 192.168.0.10: seq=3 ttl=128 time=1.045 ms
--- 192.168.0.10 ping statistics ---
4 packets transmitted, 4 packets received, 0% packet loss
round-trip min/avg/max = 1.045/0.273/3.273 ms
```

Display which appears when the connection failed.

```
PING 192.168.0.10 (192.168.0.10): 56 data bytes
--- 192.168.0.10 ping statistics ---
4 packets transmitted, 0 packets received, 100% packet loss
```

Command port set up page
Set the port number to be used with command control.
Click [Detailed set up], then [Command port set up] to display the Command port set up page.

① Input the port number to be used with command control.
② Setting update button.

[Browser Remote Control]
It is possible to operate the display with the operation buttons displayed on the WEB browser.
Click [Browser Remote Control].
The [Browser Remote Control] screen is displayed.

The Browser Remote Control can be operated in the same way as the supplied remote control.
For allocation / function of each button, see page 28.
To finish the Browser Remote Control, click [Display Control Window] or exit the browser.
(Note)

- To use this function, set [Network control] to [On]. (see page 54)
- The Browser Remote Control can also be displayed by entering “http://xxx.xxx.xxx.xxx/remote/” in the WEB browser URL entry field.
  - xxx.xxx.xxx.xxx is the IP address set for this display.
- The button long press operation is invalid.
- [Options] menu (see page 60) cannot be displayed.
- Avoid operating the multiple Browser Remote Control simultaneously.
- The same operations are applicable to both administrator privileges and user privileges.
- If the Browser Remote Control screen is not displayed, consult your network administrator.
- The screen may turn white for a moment when updating the Browser Remote Control screen, but it is not a malfunction.
- Do not operate the main unit while operating the Browser Remote Control.
- Do not operate on the WEB control screen while operating the Browser Remote Control.
- If the “Back” or “Forward” functions on the WEB browser is used, the screen display may be abnormal. In this case, the subsequent operations are not guaranteed. Update the WEB browser.

Using Web Browser Control

Crestron Connected™ (Crestron Connected™ operation screen)
You can monitor or control the Display using “Crestron Connected™”.
If Adobe Flash Player is not installed in your computer, or if the browser does not support Flash, this page does not appear. In this case, return to the previous page by clicking [Back] in the operation page.

- Operation page

1. [Tools], [Info], [Help]
   Switches the pages for tools, information, help using the tab.

2. [POWER]
   Switches between on and off of the power.

3. [VOL DOWN], [AV MUTE], [VOL UP]
   Sets the volume, AV mute.
   When the power of the Display is turned off, these operations are not available.

4. [Input Select]
   Sets the input selection.
   When the power of the Display is turned off, this operation is not available.

5. Operation buttons on the menu screen
   Operates on the menu screen.

6. Image quality adjustments
   Operate items related to image quality.

7. [Back]
   Returns to the previous page.
● [Tools] page
Click [Tools] on the operation page.

[Control System]
Sets the information required for the communication with the controller that is connected to the Display.

[User Password]
Sets the password for the user rights in the operation page of “Crestron Connected™”.

[Admin Password]
Sets the password for the administrator rights in the operation page of “Crestron Connected™”.

[Network Status]
Displays the setting of LAN.
- [DHCP]
- [IpAddress]
- [SubnetMask]
- [DefaultGateway]
Displays the value in the current setting.

[Exit]
Returns to the operation page.

Note

● [Info] page
Click [Info] on the operation page.

[Display Name]
Displays the name of the Display.

[Mac Address]
Displays the MAC address.

[Resolution]
Displays the resolution of the Display.

[Power Status]
Displays the status of the power.

[Source]
Displays the selected video input.

[Exit]
Returns to the operation page.

● [Help] page
Click [Help] on the operation page.
The [Help Desk] screen is displayed.

[Help Desk]
Sends or receives messages to the administrator who uses “Crestron Connected™”.

English 83
USB Media Player

Function description

The USB media player displays still pictures and motion pictures saved in a USB memory by inserting the USB memory device into the display unit.

Note
- To use this function, set [USB media player] to [Enable] in [Setup] - [USB media player settings]. (see page 57)
- Using the content list delivery function of the Multi Monitoring & Control Software (see page 76), content (still/motion pictures) played back on a USB media player and the playback list can be delivered. For details, refer to the manual of Multi Monitoring & Control Software.

Single Media Player
Files are played by a single unit.

Multi Media Player
Connecting more than one unit using LAN cables plays back files in the USB memory simultaneously. One of the multiple units becomes the parent, and the others are children. The two-unit configuration example is shown below. For LAN connection, see "Network environment (Multi Media Player only)" (see page 88).

Note
- For Multi Media Player, one USB memory device is required for one unit.
- Pictures in the USB memory cannot be displayed via a daisy chain connection with the DVI-D IN/OUT terminal.
- If this unit is adjacently installed when using the LightID function, the reception sensitivity of LightID on a smartphone, etc. may be degraded.

Preparation

Supported device
- Commercially available USB memory devices are supported. (Those with security functions are not supported. Operation is not guaranteed.)
- USB memory devices other than those formatted in FAT16 or FAT32 cannot be used.
- Up to 32 GB of USB memory in size are supported.
- Only single partition configuration is supported.

Preparation
Prepare the following files in the USB memory for the media player.
- Play file
- Scenario (as necessary)
- File list (as necessary)
- LightID definition file (as necessary)

Play file
The unit’s Media Player supports the formats below.

File name (Extension)

| Still image | JPG, JPEG, JPE |
| Moving image | AVI, MKV, ASF, WMV, TS, MTS, MP4, 3GP, MOV, FLV, F4V |

Codec

Moving image

<table>
<thead>
<tr>
<th>Codec</th>
<th>Maximum resolution</th>
<th>Maximum bit rate (Mbps)</th>
</tr>
</thead>
<tbody>
<tr>
<td>MPEG4VISUAL</td>
<td>480@30fps</td>
<td>30</td>
</tr>
<tr>
<td>MPEG4AVC</td>
<td>1080@30fps, High Profile (Level 4.2 or less)</td>
<td>30</td>
</tr>
<tr>
<td>VC-1 Advanced</td>
<td>1080@30fps</td>
<td>30</td>
</tr>
<tr>
<td>VC-1 Simple &amp; Main</td>
<td>1080@30fps</td>
<td>30</td>
</tr>
</tbody>
</table>

Audio

<table>
<thead>
<tr>
<th>Codec</th>
<th>Sampling frequency (kHz)</th>
<th>Bit rate (kbps)</th>
</tr>
</thead>
</table>
Scenario- / File list-associated terms

File name
It is the name of a play file.
A file name needs to include its extension.
Example:
- introduction.jpg
- Contents_video01.wmv
- Enter the extension of a file name using one-byte alphanumeric characters.

File definition
It is a file definition that is shared among scenarios and files.
- PHOTO_xxx: still image file definition
- VIDEO_xxx: moving image file definition
- The “xxx” portion can be set from 001 to 999.
- Enter a file definition using one-byte alphanumeric characters.

Play time
It is the play time of a file.
Play time can be specified from 3 seconds to 24 hours.
(Unit: second)
Example:
- 10: 10 seconds
- 86400: 24 hours
- 10.5: 10.5 seconds
- It can be set down to one-tenth (1/10) of a second using a decimal point (full stop).

Play time is omissible.
For still images, a file will be played for the period of time that you selected in [USB media player settings] - [Slide show duration]. (see page 57)
For moving images: a file will be played for the duration of the play time of the file.
- Enter play time using one-byte alphanumeric characters.
- When playing back large sized files, if you set the playing back duration short, it may not be played back properly, for example, noise appears on the screen.
- In that case, set the playing back duration longer (10 seconds or longer).

Group ID (for Multi Media Player)
It is an ID used for grouping on a network during Multi Media Player conditions.
- GroupID:Gxx : Group xx
  - The “xx” portion can be set from 01 to 10.
  - Enter a group ID using one-byte alphanumeric characters.

Note
- “UTF-8N”: UTF-8 encoding without BOM. Notepad for windows doesn’t support this encoding.
Please use another editor supported UTF-8 encoding without BOM.

Still image

Codec | Maximum resolution
--- | ---
JPEG* | 4096×4096

*: JPEG (baseline format only)

**Notes**
- Maximum size per one file is 2 GB.
- Files protected by Digital Rights Management (DRM) cannot be played back.
- Some files may not be played back even if their formats are supported as described here.
- Use a file of which audio and video are both supported.
- If the audio codec of motion picture file is incompatible in format, the pictures may not be correctly displayed.
- If there is no video file, playback is not possible.
- Depending on the USB memory device, playback may not be possible even if the bit rate of the motion picture file is less than the indicated maximum bit rate.
- Delete files irrelevant to playback from the USB memory device.

Scenario
The play order and time can be specified for a play file.
Save under the name (one-byte alphabetical characters) “scenario.dat” immediately below root in USB memory.
- Save files as UTF-8N format.

File list
It is a list of play files.
Save under the name (one-byte alphabetical characters) “filelist.dat” immediately below root in USB memory.
- Save files as UTF-8N format.

LightID definition file
This definition file specifies an individual LightID for the scenario.
Save under the name (one-byte alphabetical characters) “lightid.dat” immediately below root in USB memory.
- For creating files, use “Multi Monitoring & Control Software”. (see page 76)
Playing back the files

Example of setting in each mode

Single Media Player (Type 1)
Files will be played in the order in which their names appear in USB memory.

Scenario, file list and LightID definition file
Scenario:
Unnecessary
File list:
Unnecessary
LightID definition file:
Unnecessary

Setting example
USB memory contents

- 001_Introduction.jpg
- 002_Contents_Video1.wmv
- 003_Contents_Video2.wmv
- 004_Contents_Video3.wmv

Play contents
For the above setting example, the following contents will be played on repeat (loop).
1. 001_Introduction.jpg
2. 002_Contents_Video1.wmv
3. 003_Contents_Video2.wmv
4. 004_Contents_Video3.wmv

*1: Played for the duration set in [Slide show duration].
*2: Played for the duration of the play time of the file.

Single Media Player (Type 2)
Files will be played in the order they were listed in a scenario.

Scenario, file list and LightID definition file
Scenario:
Enter [File name: Play time].
File list:
Unnecessary
LightID definition file:
Unnecessary

Setting example
USB memory contents

- scenario.dat
- Introduction.jpg
- Contents_Video1.wmv
- Contents_Video2.wmv
- Contents_Video3.wmv

scenario.dat (scenario)
Introduction.jpg:10
Contents_Video1.wmv:10
Contents_Video2.wmv:20
Contents_Video3.wmv:

Play contents
For the above setting example, the following contents will be played on repeat (loop).
1. Introduction.jpg (10 seconds)
2. Contents_Video1.wmv (10 seconds)
3. Contents_Video2.wmv (20 seconds)
4. Contents_Video3.wmv (Played for the duration of the play time of the file)

Single Media Player (Type 3)
Files will be played in the order they were listed in a scenario.

Scenario, file list and LightID definition file
Scenario:
Enter [File definition: Play time].
File list:
Enter [File definition: File name].
LightID definition file:
Unnecessary

- R_Contents_Video1.wmv
- R_Contents_Video2.wmv
- R_Contents_Video3.wmv

**Play contents**
For the above setting example, the following contents will be played on repeat (loop).

**Parent side**
1. L_Introduction.jpg (10 seconds)
2. L_Contents_Video1.wmv (10 seconds)
3. L_Contents_Video2.wmv (20 seconds)
4. L_Contents_Video3.wmv (*1)

**Child side**
1. R_Introduction.jpg (10 seconds)
2. R_Contents_Video1.wmv (10 seconds)
3. R_Contents_Video2.wmv (20 seconds)
4. R_Contents_Video3.wmv (*1)

*1: Played for the duration of the play time of L_Contents_Video3.wmv (Parent side).

**Note**
- While the menu screen is not displayed, you can skip to the next playback file with ▶, to the previous playback file with ◀, or play back again from the beginning of the file with ◀ (Remote control operation only).
- [Multi display settings] supports 2×1, 1×2 and 2×2. (see page 52)
- If this unit is adjacently installed when using the LightID function, the reception sensitivity of LightID on a smartphone, etc. may be degraded.
You can run a USB memory contents check in [USB media player settings] - [Scenario file check]. (see page 57)

If an error is present, the information is given with the following details.

A(B): C  
D

A: Name of the file with an error
B: Row with an error
C: Error code
D: Detail of the error

**Note**

- Shows leading error codes.

Details of the detected errors are as follows.

<table>
<thead>
<tr>
<th>Error code</th>
<th>Detail of the error</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>No USB memory is inserted.</td>
</tr>
<tr>
<td>2.</td>
<td>scenario.dat/filelist.dat/lightid.dat cannot be opened.</td>
</tr>
<tr>
<td>3.</td>
<td>There is an error in the contents of scenario.dat/filelist.dat.</td>
</tr>
<tr>
<td>4.</td>
<td>The play file format is not supported.</td>
</tr>
<tr>
<td>5.</td>
<td>No play file exists.</td>
</tr>
<tr>
<td>6.</td>
<td>The necessary group ID for Multi Media Player has not been specified.</td>
</tr>
<tr>
<td>7.</td>
<td>There are several identical file definitions.</td>
</tr>
<tr>
<td>8.</td>
<td>The scenario’s play time is over the limit.</td>
</tr>
<tr>
<td>9.</td>
<td>The file definition listed in the scenario is not in the file list.</td>
</tr>
<tr>
<td>10.</td>
<td>The scenario contains 0 or over 1000 play files.</td>
</tr>
<tr>
<td>11.</td>
<td>There are 0 or over 1000 play files. (Single Media Player (Type 1) only)</td>
</tr>
<tr>
<td>12.</td>
<td>Only the group ID is listed on the file list. (Multi Media Player only)</td>
</tr>
<tr>
<td>13.</td>
<td>There is an error in the contents of lightid.dat.</td>
</tr>
</tbody>
</table>

- For error code 1, 11 and 13, only the error code and the detail of the error are displayed as shown below.

1

No USB memory is inserted.

**Supplementary note**

The USB memory contents check does not determine whether or not a play file is playable.

If a file cannot be played while Media Player is active, an error message will be displayed.

When performing the synchronized playback on the Multi Media Player, check in the menu [USB media player settings] - [Scenario file check] that the file is playable.

---

### Network environment (Multi Media Player only)

**Example of setting up LAN connection and IP address / Subnet mask**

As mentioned below, connect several units together with LAN cables and set up IP addresses / Subnet masks so that all the displays exist on the same network.

- Parent
  - IP address: 192.168.10.1
  - Subnet mask: 255.255.255.0

- Child
  - IP address: 192.168.10.2
  - Subnet mask: 255.255.255.0

- Child
  - IP address: 192.168.10.3
  - Subnet mask: 255.255.255.0

- Child
  - IP address: 192.168.10.4
  - Subnet mask: 255.255.255.0

**Note**

- Set [Network control] of all displays to [On]. (see page 54)
- Depending on the network environment, synchronization may be largely lost.
- Do not connect other devices to prevent network traffic jam.
- With a router put in between, you cannot set up connection. Use them within the same subnet.
- Do not use wireless LAN for connection since playback may not be performed normally.
Starting / ending Media Player

■ For Single Media Player

Start
1. Insert the USB memory device for Media Player into the USB terminal of the display unit.
   (Note)
   ● Depending on the type of a USB memory device, it may come in contact with the periphery such as a back cover, and cannot be attached. Use a commercially sold extension cable, or use a small type of a USB memory device connectable to this unit.
2. Run a USB memory contents check.
3. Change INPUT to [USB].

Ending
Change INPUT to other than [USB].

■ For Multi Media Player

Start
1. Connect several units with LAN cables.
   (See “Example of setting up LAN connection and IP address / Subnet mask in the previous section.)
2. Insert the USB memory device for Media Player into the USB terminal of each display.
3. Executes USB memory contents check on each Display.
4. Change INPUT for Child to [USB].
5. Change INPUT for Parent to [USB].

Ending
Change INPUT for Parent to other than [USB].

Resume Play function

After Media Player ends, the file to be played back next time varies depending on the setting of [USB media player settings] - [Resume play].

When set to [On]:
The file played prior to the end of Media Player starts playing from the beginning.

When set to [Off]:
Play starts from the beginning of the first file of the scenario.

Note
● The resume play function is retained until the unit is turned off or the USB memory device is taken out.
ID Remote Control Function

You can set the remote control ID when you want to use this remote control on one of several different displays. In that case, you need to set the remote control’s ID number to match the Display’s ID number you have set in [Options] - [Display ID] following the steps below.

**Note**

- To operate this function, please purchase ID remote controller sold separately.
  
  Object model: N2QAYA000093

---

### Setting the remote control’s ID number

1. **Set [Controller ID function] to [On].**
   
   (see page 66)
   
   - While displaying [Options] menu, you can operate even if the ID does not match.

2. **Set the remote control’s <ID MODE> switch to <ON>.**

3. **Pointing the remote control at the Display you want to control, press <ID SET>.**

4. **Press one of <0> - <9>.**
   
   Sets the tens digit.

5. **Press one of <0> - <9>.**
   
   Sets the units digit.
   
   - The steps from 3 to 5 need to be done within 5 seconds.
   
   - Adjustable ID number range is 0 - 100.
     
     **Example:**
     
     - To set the ID to “1”: After step 3, press <0> and then <1>.
     - To set the ID to “12”: After step 3, press <1> and then <2>.
     - To set the ID to “100”: After step 3, press <1> <0> <0>.

### Cancelling the setting of remote control’s ID number (ID “0”)

You can operate even if the ID does not match the ID set in [Options] - [Display ID].

**Press <ID SET> for more then 3 seconds.**

This has the same effect as pressing <ID SET> <0> <0>.

(Note)

- The ID remote control cannot be used when [Options] - [Display ID] is set to anything other than “0”, and the remote control ID is not the same as the [Options] - [Display ID] number. (see page 66)
Entering characters

Some settings require to enter characters.
To enter text, select characters in the on-screen keyboard.

Example: Entering profile names ([Memory save])

The default profile name is [MEMORY1], here, we are changing it to [MY PICTURE] as an example.

   MEMORY1
   -------
   1 2 3 4 5 6 7 8 9 0
   a b c d e f g h i j
   k l m n o p q r st
   u v w x y z

   All text is deleted.
   To delete individual characters, select [Delete].

2. Select [a / A / @] with ▲▼◄►, and press <ENTER>.

   01 2 3 4 5 6 7 8 9
   a b c d e f g h i j
   k l m n o p q r st
   u v w x y z
   ▲▼◄► Ok Cancel
   a/A/@

   Switches the keyboard to the upper case alphabet.
   Each time <ENTER> is pressed, the keyboard is switched in the order of lower case, upper case and symbols.

   M
   -------
   Repeat this process to enter the next character.

4. Select Space key with ▲▼◄►, and press <ENTER>.

   MY
   -------
   1 2 3 4 5 6 7 8 9 0
   a b c d e f g h i j
   k l m n o p q r st
   u v w x y z
   ▲▼◄► Ok Cancel
   Delete All delete a/A/@

   As shown in step 3, select the characters to enter [PICTURE].

5. When you finished entering the profile name, select [Ok] with ▲▼◄► and press <ENTER>.

   MY PICTURE
   -------
   1 2 3 4 5 6 7 8 9 0
   a b c d e f g h i j
   k l m n o p q r st
   u v w x y z
   ▲▼◄► Ok Cancel
   Delete All delete a/A/@

   ● To cancel saving the profile, select [Cancel].
Preset Signals

This unit can display the video signals shown in the table below.

</tbody>
</table>

*1: When 1 125(1 035)/60i signal is input, it is displayed as 1 125(1 080)/60i signal.

*2: Pixel-Repetition signal (dot clock frequency 27.0 MHz) only

*3: Signals to represent formats are as follows.

V : Composite Video (VIDEO IN)
R : D-sub RGB (RGB IN, PC IN)
Y : YCbCr/YPbPr (COMPONENT IN, PC IN)
D : DVI-D (DVI-D IN)
H : HDMI (HDMI 1, HDMI 2)
DL : DIGITAL LINK (DIGITAL LINK)
The analogue input supports onG and onY.

*4: Displayed with image elements thinned out in the image processing circuit.

*5: Based on VESA CVT-RB (Reduced Blanking) standard

*6: Not supported when [DIGITAL LINK mode] is set to [Long reach].

*7: The picture may not be displayed correctly with the PC signal from COMPONENT IN/RGB IN inputs.

(Notes)
- An auto detected signal format may be differently displayed from the actual input signal.
- The number of dots of resolution means the interlace signal.
- When 1 125(1 080)/30PsF signal and 1 125(1 080)/25PsF signal are input, they are processed as 1 125(1 080)/60i signal and 1 125(1 080)/50i signal, and then displayed.
Shipping condition

You can reset the settings / the adjusted values of the following menus to the factory settings:
[Picture], [Sound], [Setup], [Position], [Options]

Remote control

1 Press <SETUP> to display the [Setup] menu.

2 Select [OSD language] with ▲▼, and press <ENTER> for more than 3 seconds.
   The following screen will be displayed.

   Options
   Display serial number
   Software licenses
   USB data cloning
   Shipping

3 Select [Shipping] with ▲▼ and press <ENTER>.

   Shipping
   YES NO

4 Select [YES] with ▶ and press <ENTER>.
   The message [Shipping ( Wait a moment )] will be displayed.

5 After the message [Please turn off the power] is displayed, turn the power off pressing <Main Power On / Off button>.
   - If the <Main Power On / Off button> is locked, please disconnect the AC cord plug from the wall outlet.
Menu settings and adjusted values set on a single display can be copied to multiple displays using a USB memory.

**Data that can be copied**

Settings and set values of [Picture], [Sound], [Setup], [Position] and [Options] menus

- The following data cannot be copied. Setting is required for each display.
  - [Date and time]
  - Setting for [Network settings] - [LAN setup]
  - Display ID in [Options] - [Display ID]

**Supported device**

- Commercially available USB memory devices are supported. (Those with security functions are not supported. Operation is not guaranteed.)
- USB memory devices other than those formatted in FAT16 or FAT32 cannot be used.
- Up to 32 GB of USB memory in size are supported.
- Only single partition configuration is supported.

**Note**

- If the sizes of the displays are different, the cloning function does not operate. Use the common sized displays.
- The remote control is used to display [USB data cloning] menu. Unit buttons cannot be used to display the menu.
- Set the input to something other than [USB], and perform the data cloning.

---

**Copying the display data to the USB memory**

1. Insert the USB memory device to the USB terminal of the display of data copy source.

   After the [Select Copy Type] screen is displayed, go to the step 5.

![USB terminal and USB memory](image)

   **(Note)**

   - If the USB memory containing the data for cloning is connected in power-on state, the [Select Copy Type] message in step 5 is displayed.
   - Depending on the type of a USB memory device, it may come in contact with the periphery such as a back cover, and cannot be attached. Use a commercially sold extension cable, or use a small type of a USB memory device connectable to this unit.
   - Failure to save in or read from the USB memory displays an error message.

   The following display appears.

   ![Options menu](image)

5. Select [Display → USB Memory] with ▲▼ and press <ENTER>.

   ![Select Copy Type menu](image)
6 Select [YES] with  and press  <ENTER>.

Data copy to the USB memory starts.

Data to USB Memory
The data will be overwritten when any data exists originally.
Are you OK to write the data?

YES
NO

The following message is displayed after data copy has finished.

Data copy finished.

7 After data copy has finished, remove the USB memory device from the USB terminal.

Copy the USB memory data to the display

1 Insert the USB memory device with copied data to the USB terminal of the display of data copy destination (same as the step 1 on page 95).

After the [Select Copy Type] screen is displayed, go to the step 5.

Note
● If the USB memory containing the data for cloning is connected in power-on state, the [Select Copy Type] message in step 5 is displayed.

2 Display [Setup] menu pressing <SETUP>.

3 Select [OSD language] with  and press <ENTER> for over 3 seconds.

The following display appears.

Options
Display serial number
Software licenses
USB data cloning
Shipping

4 Select [USB data cloning] with  and press <ENTER>.

5 Select [USB Memory → Display] with  and press <ENTER>.

Select Copy Type
Display → USB Memory
USB Memory → Display

6 Select [YES] with  and press <ENTER>.

Data copy to the display starts.

Data from USB Memory
Do you copy the data?

YES
NO

The following message is displayed after data copy has finished.

Cloning finished. Please turn off the power.

7 After data copy has finished, remove the USB memory device from the USB terminal.

8 Press the <Main Power On / Off button> to turn the power OFF, and turn the power ON again.

The copied content is applied to the display.

● If the <Main Power On / Off button> is locked, please disconnect the AC cord plug from the wall outlet.

● When USB memory is not removed in the step 7, the message [Select Copy Type] is displayed when the display is turned on again.

Note
● If the data is copied with [POWER button lock] set to [On], this function operates after turning the power off, and the <Main Power On / Off button> cannot be used to turn the power on. In this case, remove the power plug, wait sufficient time, and then connect the power plug again to turn the power on.

● [POWER button lock] function is only for TH-55SF1HU, TH-49SF1HU and TH-42SF1HU.
Rewriting the Internal LightID

Using the USB memory device, the LightID written in the LightID-distribution file can be updated as the Internal LightID of the display.

**Supported device**
- Commercially available USB memory devices are supported. (Those with security functions are not supported. Operation is not guaranteed.)
- USB memory devices other than those formatted in FAT16 or FAT32 cannot be used.
- Up to 32 GB of USB memory in size are supported.
- Only single partition configuration is supported.

**Note**
- Only one Internal LightID can be written.
- Save only the LightID-distribution file in the USB memory device. If multiple files have been saved, the Internal LightID may not be updated.
- If multiple LightIDs have been written in the LightID-distribution file, the first LightID in the file is written as the Internal LightID.
- The first written LightID can be confirmed on the Web menu from which the LightID was obtained, or on the “Multi Monitoring & Control Software” (see page 76).
- If multiple LightIDs have been written in the LightID-distribution file, using the “Multi Monitoring & Control Software” (see page 76) can select the desired ID and update it.
- To restore the Internal LightID to the default state, see “Shipping condition” (see page 94).
- How to obtain the LightID-distribution file (see page 51)
- If the file name contains characters other than one-byte alphabetic character, this function may not work properly.
  - If it does not work, change the file name to that in the form of [****.bin] (****: one-byte alphanumeric).
- The password input screen disappears if no operation is performed for the period set for [Menu display duration]. (see page 59)
- If the menu disappears, perform the operation again from step 2.

1. **Copy the LightID distribution file to the USB memory device.**

2. Insert the USB memory device to the USB terminal on the bottom of the display.
   A menu to confirm that the rewrite of the Internal LightID starts is displayed.

3. To update the Internal LightID, select [YES] with ◄►, and press <ENTER>.

4. Enter the password given when obtaining the LightID-distribution file, select [Ok] and press <ENTER>. (see page 91)
   A menu to confirm if the write is performed is displayed.

5. Check if the Management ID displayed on the menu is for the write.
   The Management ID is the management number assigned when the LightID is distributed.

6. To rewrite the Internal LightID, select [YES] with ◄►, and press <ENTER>.

7. When the write of the Internal LightID is complete, remove the USB memory device from the USB terminal.

   Internal LightID upgrades successful!
   Please remove the USB device.
### Troubleshooting

Before you call for service, determine the symptoms and make a few simple checks as shown below.

</tr>
<tr>
<td>Symptoms</td>
<td>Check</td>
</tr>
<tr>
<td>------------------------------------------------------------------------</td>
<td>---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
</tbody>
</table>
| [Controller ID function] function cannot be used. (When using ID remote controller) | Check whether [Controller ID function] is set to [On], or <ID MODE> switch is set to <ON>. (see page 66)  
(When [Controller ID function] is set to [On], you need to set <ID MODE> switch to <ON> and set the ID number.)                                                                                                                                                                                                                           |
| The top or bottom of the picture on the screen is cut off.             | The image position has been adjusted in the [Position] menu.  
Adjust the position of the picture on the screen. (see page 37, 38)                                                                                                                                                                                                                                                                 |
| There are areas at the top and bottom of the screen where picture is not displayed. | When using a video software program (such as a cinema size program) with a screen wider than one in the 16:9 mode, blank areas separate from the images are formed at the top and bottom of the screen.                                                                                                                                                                                                 |
| Parts of the unit become hot.                                          | Even when the temperature of parts of the front, top and rear panels has risen, these temperature rises will not pose any problems in terms of performance or quality.                                                                                                                                                                                                                             |
| There is no picture displayed or sound output sometimes.              | When HDMI or DVI signals are input to the Display using a selector or distributor, sound or images may not be output in the normal fashion depending on the selector or distributor used.  
The symptoms may be improved by turning the power off and on again, or by replacing the selector or distributor.                                                                                                                                                                                                |
| The RS-232C is uncontrollable.                                         | Check that the connection has been made properly. (see page 21)  
To control RS-232C with the Display’s SERIAL IN terminal:  
Check that [Network settings] - [Serial control] is set to [SERIAL IN].  
To control RS-232C with the twisted pair cable transmitter:  
Check that [Network settings] - [Serial control] is set to [DIGITAL LINK], [Network control] is set to [On] and [DIGITAL LINK mode] is set to [Auto], [DIGITAL LINK] or [Long reach]. (see page 54, 56)                                                                                           |
| The LAN is uncontrollable.                                             | Check that the connection has been made properly. (see page 70)  
To control with WEB browser control or command control, check that [Network control] is set to [On]. (see page 54)  
Check that [LAN setup] is set properly. (see page 55)  
When connecting to a device of AMX, Extron or Crestron Electronics, Inc., set [AMX D. D.], [Extron XTP] or [Crestron Connected™] according to the device to use. (see page 57)  
See the [DIGITAL LINK status] - [Signal quality] information to check the LAN cable status such as whether the LAN cable is disconnected or the cable is not shielded. (see page 56)                                                                 |
| There is no picture displayed or sound output from the [DIGITAL LINK] terminal. | Check whether the connection has been made properly between the video (output) equipment and twisted pair cable transmitter and between the twisted pair cable transmitter and this product. (see page 71)  
Check that [DIGITAL LINK mode] is not set to [Ethernet]. (see page 56)                                                                                                                                                                                                                                                                       |
### The LightID cannot be received.

<table>
<thead>

</thead>
<tbody>
<tr>
<td>Check that [LightID] is not set to [Off]. (see page 51)</td>
<td>When [LightID] is not set to [External control]</td>
</tr>
<tr>
<td>Check that the LightID transmission is specified by “Multi Monitoring &amp; Control Software” or the function of the USB media player. (see page 76)</td>
<td></td>
</tr>
<tr>
<td>Check if intense light is hitting the LCD panel.</td>
<td>Reception may be difficult if the displayed image is dark.</td>
</tr>
<tr>
<td>Check that the devices such as smartphones are connected properly.</td>
<td></td>
</tr>
</tbody>
</table>

### LCD Display panel

<table>
<thead>
<tr>
<th>Symptoms</th>
<th>Check</th>
</tr>
</thead>
<tbody>
<tr>
<td>The screen darkens slightly when bright pictures with minimal movements are shown.</td>
<td>The screen will darken slightly when photos, still images of a computer or other pictures with minimal movements are shown for an extended period. This is done to reduce image retention on the screen and the shortening of the screen's service life: It is normal and not indicative of malfunctioning.</td>
</tr>
<tr>
<td>It takes a while for the picture to appear.</td>
<td>The unit digitally processes the various signals in order to reproduce esthetically pleasing images. As such, it sometimes takes a few moments for the picture to appear when the power has been turned on, when the input has been switched.</td>
</tr>
<tr>
<td>The edges of the images flicker.</td>
<td>Due to the characteristics of the system used to drive the liquid crystal panel, the edges may appear to flicker in the fast-moving parts of the images: This is normal and not indicative of malfunctioning.</td>
</tr>
<tr>
<td>There may be red spots, blue spots, green spots and black spots on the screen.</td>
<td>This is a characteristic of liquid crystal panels and is not a problem. The liquid crystal panel is built with very high precision technology giving you fine picture details. Occasionally, a few non-active pixels may appear on the screen as fixed points of red, blue, green, or black. Please note this does not affect the performance of your LCD.</td>
</tr>
</tbody>
</table>

This LCD Display uses special image processing. Hence a slight time lag may occur between image and audio, depending on the type of input signal. However, this is not a malfunction.

### Power source

TH-55SF1HU, TH-49SF1HU, TH-42SF1HU:

110 – 127 V ~ (110 – 127 V alternating current), 50/60Hz

TH-55SF1HW, TH-49SF1HW, TH-42SF1HW:

220 – 240 V ~ (220 – 240 V alternating current), 50/60Hz

### Operating condition

**Temperature**

0 °C to 40 °C (32 °F to 104 °F)*

**Humidity**

20 % to 80 % (no condensation)

### Storing condition

**Temperature**

-20 °C to 60 °C (-4 °F to 140 °F)

**Humidity**

20 % to 80 % (no condensation)

### Connection terminals

**HDMI 1**

**HDMI 2**

- TYPE A Connector* × 2

Audio signal:

Linear PCM (sampling frequencies - 48 kHz, 44.1 kHz, 32 kHz)
DVI-D IN
DVI-D 24 Pin × 1:
Compliance with DVI Revision 1.0
Content Protection:
Compatible with HDCP 1.1

DVI-D OUT
DVI-D 24 Pin × 1:
Compliance with DVI Revision 1.0
Content Protection:
Compatible with HDCP 1.1

COMPONENT/RGB IN
Y/G
BNC terminal × 1
1.0 Vp-p (75 Ω) (with sync signal)
Ps/Cs/B
BNC terminal × 1
0.7 Vp-p (75 Ω) (without sync signal)
Pn/Cr/R
BNC terminal × 1
0.7 Vp-p (75 Ω) (without sync signal)

VIDEO IN
VIDEO
BNC terminal × 1
1.0 Vp-p (75 Ω)
Also used as Y/G terminal

PC IN
Mini D-sub 15 Pin (Compatible with DDC2B) × 1
Y/G:
1.0 Vp-p (75 Ω) (with sync signal)
0.7 Vp-p (75 Ω) (without sync signal)
Ps/Cs/B:
0.7 Vp-p (75 Ω) (without sync signal)
Pn/Cr/R:
0.7 Vp-p (75 Ω) (without sync signal)
HD/VD:
1.0 - 5.0 Vp-p (high impedance)

AUDIO1 IN
Stereo mini jack (M3) × 1, 0.5 Vrms
Shared with DVI-D IN and PC IN

AUDIO2 IN
Stereo mini jack (M3) × 1, 0.5 Vrms
Shared with COMPONENT/RGB IN and VIDEO IN

AUDIO OUT
Stereo mini jack (M3) × 1, 0.5 Vrms
Output: Variable (-∞ to 0 dB)
(1 kHz 0 dB input, 10 kΩ load)

SERIAL IN
External Control Terminal
D-sub 9 Pin × 1:
RS-232C compatible

SERIAL OUT
External Control Terminal
D-sub 9 Pin × 1:
RS-232C compatible

DIGITAL LINK/LAN
RJ45 × 1:
For RJ45 network connections, compatible with PJLink
Communication method:
RJ45 100BASE-TX

IR IN
Stereo mini jack (M3) × 1

IR OUT
Stereo mini jack (M3) × 1

USB
TYPE A USB connector × 1
DC 5V / 1A (USB 3.0 is not supported.)

Sound
Speakers
80 mm × 30 mm × 2 pcs
Audio Output
20 W [10 W + 10 W] (10 % THD)

Remote Control Transmitter

Power source
DC 3 V (battery (AAA/R03/UM4 type) × 2)

Operating range
Approx. 7 m (22.9 ft)
(when operated directly in front of remote control sensor)

Mass
Approx. 63 g / 2.22 oz (including batteries)

Dimensions (W × H × D)
44 mm × 105 mm × 20.5 mm /
1.74” × 4.14” × 0.81”
*1: Environmental temperature to use this unit at high altitudes (1 400 m (4 593 ft) and higher and below 2 800 m (9 186 ft) above sea level): 0 °C to 35 °C (32 °F to 95 °F)

*2: VIERA LINK is not supported.

**Note**

- Design and specifications are subject to change without notice. Mass and dimensions shown are approximate.

Notice about AVC/VC-1/MPEG-4

This product is licensed under the AVC Patent Portfolio License, VC-1 Patent Portfolio License and MPEG-4 Visual Patent Portfolio License for the personal use of a consumer or other uses in which it does not receive remuneration to (i) encode video in compliance with the AVC Standard, VC-1 Standard and MPEG-4 Visual Standard (“AVC/VC-1/MPEG-4 Video”) and/or (ii) decode AVC/VC-1/MPEG-4 Video that was encoded by a consumer engaged in a personal activity and/or was obtained from a video provider licensed to provide AVC/VC-1/MPEG-4 Video. No license is granted or shall be implied for any other use. Additional information may be obtained from MPEG LA, LLC. See http://www.mpegla.com.
Disposal of Old Equipment and Batteries
Only for European Union and countries with recycling systems

These symbols on the products, packaging, and/or accompanying documents mean that used electrical and electronic products and batteries must not be mixed with general household waste. For proper treatment, recovery and recycling of old products and used batteries, please take them to applicable collection points in accordance with your national legislation. By disposing of them correctly, you will help to save valuable resources and prevent any potential negative effects on human health and the environment.

For more information about collection and recycling, please contact your local municipality. Penalties may be applicable for incorrect disposal of this waste, in accordance with national legislation.

Note for the battery symbol (bottom symbol)
This symbol might be used in combination with a chemical symbol. In this case it complies with the requirement set by the Directive for the chemical involved.

Information on Disposal in other Countries outside the European Union
These symbols are only valid in the European Union. If you wish to discard these items, please contact your local authorities or dealer and ask for the correct method of disposal.

Notice (U.S.A. only)
Disposal may be regulated in your community due to environmental considerations. For disposal or recycling information, please visit Panasonic website: http://www.panasonic.com/environmental or call 1-888-769-0149.

Customer’s Record
The model number and serial number of this product may be found on its rear panel. You should note this serial number in the space provided below and retain this book, plus your purchase receipt, as a permanent record of your purchase to aid in identification in the event of theft or loss, and for Warranty Service purposes.
