

HDVC Case Study – Manufacturer-1

<Key Point> Stable sound quality and TCO with 5-year maintenance against Web Conference System

Background

They used Web conference system and did not satisfy with its poor sound quality. They compared the Polycom MCU structure and Panasonic MPCS structure and finally decided to chose Panasonic.

Introduction

- Tokyo HQ (2) •Data center(MPCS)
- Factory (4) •Related Company(2)
- Branch and Laboratory (7) •Overseas (4)

Use of HDVC

- Monthly Executive meetings
- Meeting between HQ and other offices

Configuration

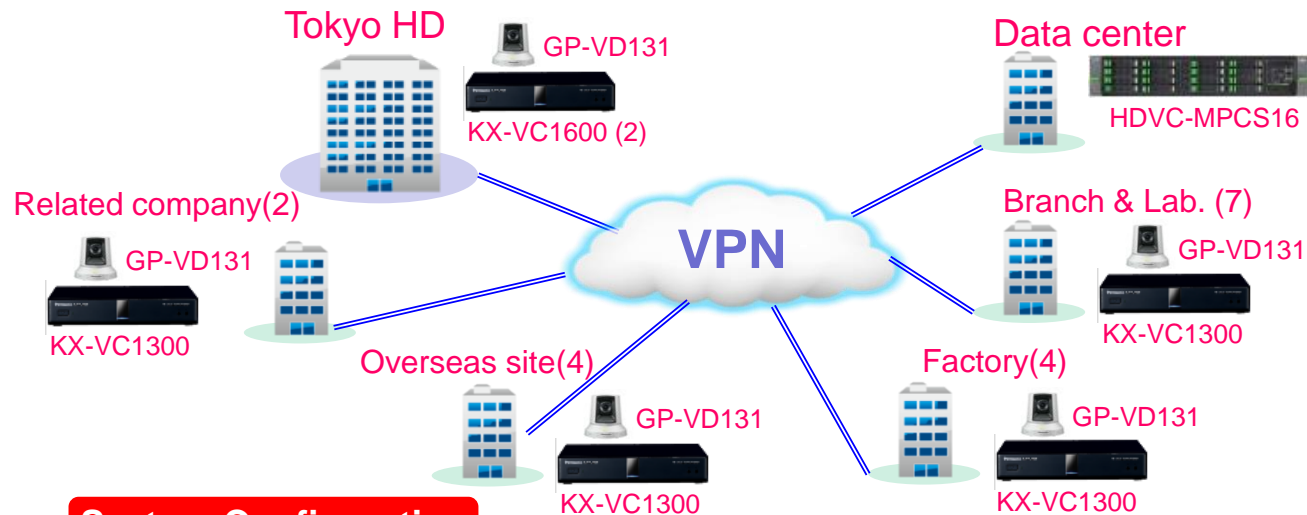

- KX-VC1600×2
- KX-VC1300×14
- HDVC-MPCS16

Further Plan

- Introduce to overseas offices. (USA, China, Asia)
- Improve internal office communication with HDVC Mobile for Windows.

Benefit

With Web conference system, there was two-way communication, but just one way from organizer side. They couldn't have natural feeling during meetings. With HDVC, they are enjoying excellent quality of two-way communication with natural feeling.

System Configuration

- use of cooperate VPN •HDVC-MPCS is located at Data center.
- Regular meeting organized with HDVC built in MCU.
- MPCS for company wide conference (up to 16 sites)
