

### Manufacturing

HPL Electric & Power Ltd is India's leading Electric equipment manufacturer having their corporate office in India.

They have around 30 branches PAN India which they wanted to connect using Panasonic HDVC to decrease their monthly travel time for review meetings and discussions.

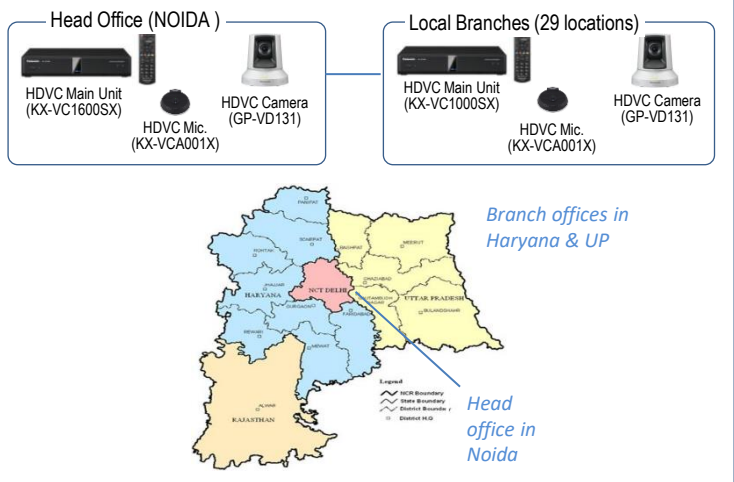

*Competition offered their MCU wherein we offered our VC-1600 which can connect 10 locations in continuous presence at Full HD 1080p.*

*HDVC provides a competitive cost effective solution without adding any external bridge/ MCU which was one of the main reasons for the success of this project.*

Solution created by-  
Amit Bhardwaj,  
Harmanjit Singh  
Panasonic India

### System Configuration
