

Office/Education Solution A flexible connection between remote offices was achieved with easy remote control operation. HDVCs are frequently used as a daily communication tool.

Having a conference call with feeling close to the other party in the display as if the table was connected to the back of the display.

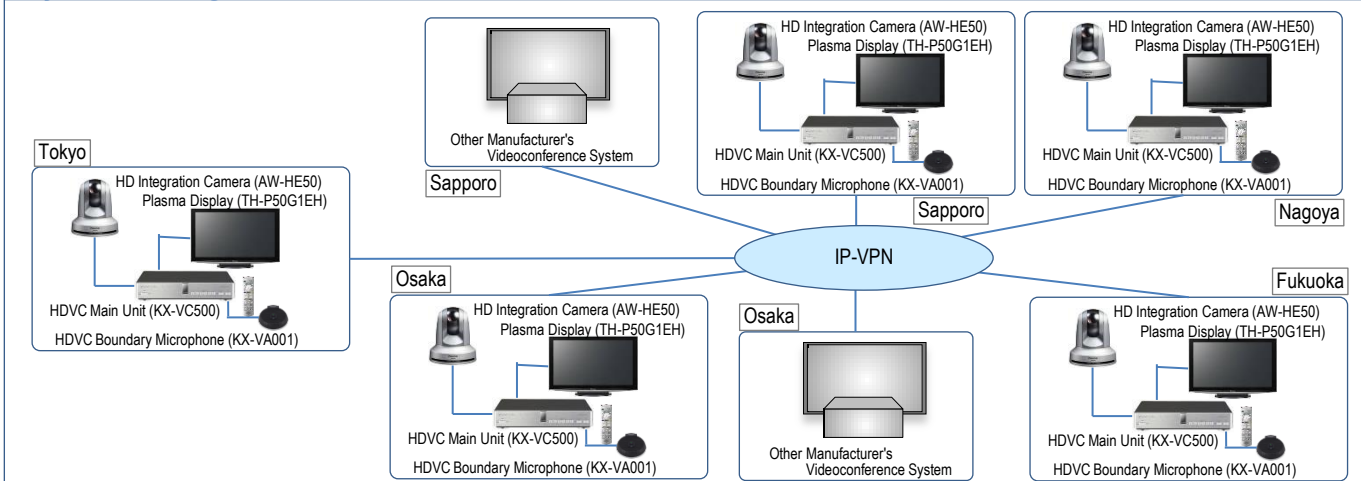

HDVC can connect to a PC wirelessly via WIVIA (distributed by Uchida Yoko).

An HD integration camera is installed above a monitor display with a pedestal made by Uchida Yoko.
