

Electric Works Company, Panasonic Corporation Environmental Policy

We have positioned “environmental contribution” as a pillar of our business activities*¹ and, by providing safe and comfortable living spaces, will contribute to the construction of a sustainable society.

Policies

- 1 We promote environmental activities to use energy effectively (reduction of CO₂ emissions), advance resources recycling, use less water, enhance chemical substance management, and also take biodiversity into consideration throughout the complete life cycle of our products*².
- 2 We will pay strict observance to environmental laws and ordinances, and to environmental practices agreed upon with partner organizations
- 3 We will pay strict observance to environmental laws and ordinances and to environmental practices agreed upon with partner organizations.
- 4 We will engage in environmental education, awareness activities and information disclosure.
- 5 We will contribute to society by lending cooperation and support to the environmental activities of local and central government and other related organizations.

*1 Major Business Fields : Electrical equipment/materials business and engineering business (lighting fixtures, wiring devices, security and disaster risk reduction, energy solutions, etc.)

*2 Product life cycle : All product-related processes from design, procurement, manufacture, sales, distribution and installation to utilization, disposal and recycling.
